# **UNITED STATES** SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

# FORM 10-K

(Mark One)

X ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 For the fiscal year ended December 31, 2020 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 Commission File Number: 0-51142 UNIVERSAL LOGISTICS HOLDINGS, INC. (Exact Name of Registrant as Specified in Its Charter) 38-3640097 Michigan (I.R.S. Employer (State or Other Jurisdiction of Incorporation or Organization) Identification No.) 12755 E. Nine Mile Road Warren, Michigan 48089 (Address, including Zip Code of Principal Executive Offices) (586) 920-0100 (Registrant's telephone number, including area code) Securities registered pursuant to Section 12(b) of the Act: Title of each class Trading Symbol(s) Name of each exchange on which registered The NASDAQ Stock Market LLC Common Stock, no par value ULH. Securities registered pursuant to Section 12(g) of the Act: None Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes 🗆 No 🗵 Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes 🗆 No 🗵 Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ⊠ No □ Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes 🗵 No 🗆 Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. Large Accelerated filer  $\boxtimes$ П Accelerated filer Non-accelerated filer |X|Smaller reporting company П Emerging growth company If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes  $\ \square$  No  $\ \boxtimes$ 

As of July 4, 2020, the last business day of the registrant's most recently completed second quarter, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant, based upon the closing sale price of the common stock on July 2, 2020, as reported by The Nasdaq Stock Market, was approximately \$115.9 million (assuming, but not admitting for any purpose, that all (a) directors and executive officers of the registrant are affiliates, and (b) the number of shares held by such directors and executive officers does not include shares that such persons could have acquired within 60 days of July 4, 2020).

The number of shares of common stock, no par value, outstanding as of March 8, 2021, was 26,919,455.

### DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for the Registrant's 2021 Annual Meeting of Shareholders are incorporated by reference in Part III of this Form 10-K.

#### DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K ("Form 10-K") contains forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995, that involve risks and uncertainties. Many of the forward-looking statements are located in Part II, Item 7 of this Form 10-K under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations." Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Forward-looking statements can also be identified by words such as "future," "anticipates," "believes," "targets," "estimates," "expects," "intends," "will," "would," "could," "can," "may," and similar terms. Forward-looking statements are not a guarantee of future performance, and the Company's actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, those discussed in Part I, Item 1A of this Form 10-K under the heading "Risk Factors," which are incorporated herein by reference. All information presented herein is based on the Company's fiscal calendar. Unless otherwise stated, references to particular years, quarters, months, or periods refer to the Company," "we," "us" and "our" as used herein refers collectively to Universal Logistics Holdings, Inc., and its subsidiaries, unless otherwise stated. The Company assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law.

#### PART I

#### ITEM 1: BUSINESS

### **Company Background**

We are a leading asset-light provider of customized transportation and logistics solutions throughout the United States, and in Mexico, Canada and Colombia. We offer our customers a broad array of services across their entire supply chain, including truckload, brokerage, intermodal, dedicated, and value-added services.

We provide a comprehensive suite of transportation and logistics solutions that allow our customers to reduce costs and manage their global supply chains more efficiently. We market and deliver our services in several ways:

- Through a direct sales and marketing network focused on selling our portfolio of services to large customers in specific industry sectors;
- Through a network of agents who solicit freight business directly from shippers; and
- Through company-managed facilities and full-service freight forwarding and customs house brokerage offices.

At December 31, 2020, we had an agent network totaling approximately 295 agents, and we operated 52 company-managed terminal locations and serviced 59 value-added programs at locations throughout the United States and in Mexico, Canada and Colombia.

We were incorporated in Michigan on December 11, 2001. We have been a publicly held company since February 11, 2005, the date of our initial public offering.

Our principal executive offices are located at 12755 E. Nine Mile Road, Warren, Michigan 48089.

#### **Operations**

We broadly group our revenues into the following service categories: truckload, brokerage, intermodal, dedicated, and value-added services.

*Truckload*. Our truckload services include dry van, flatbed, heavy-haul and refrigerated operations. Truckload services represented approximately \$201.4 million, or 14.5%, of our operating revenues in 2020. We transport a wide variety of general commodities, including automotive parts, machinery, building materials, paper, food, consumer goods, furniture, steel and other metals on behalf of customers in various industries. Truckload services also include our final mile and ground expedited services. Our transportation services are provided through a network of owner-operators and employee drivers.

*Brokerage*. We provide customers freight brokerage services by utilizing third-party transportation providers to transport goods. Brokerage services also include full service domestic and international freight forwarding, and customs brokerage. In 2020, brokerage services represented approximately \$336.4 million, or 24.2%, of our operating revenues.

*Intermodal*. Intermodal operations include steamship-truck, rail-truck, and support services. Intermodal support services represented \$393.6 million, or 28.3%, of our operating revenues in 2020. Our intermodal support services are primarily short-to-medium distance delivery of both international and domestic containers between the port or railhead and the customer and drayage services.

*Dedicated.* Our dedicated services are primarily provided in support of automotive customers using van equipment. In 2020, dedicated services represented approximately \$127.5 million, or 9.2%, of our operating revenues. Our dedicated services are primarily short run or round-trip moves within a defined geographic area provided through a network of union and non-union employee drivers, owner-operators, and contract drivers.

*Value-Added*. Our value-added services, which are typically dedicated to individual customer requirements, include material handling, consolidation, sequencing, sub-assembly, cross-dock services, kitting, repacking, warehousing and returnable container management. Value-added services represented approximately \$332.2 million, or 23.8%, of our operating revenues in 2020. Our facilities and services are often directly integrated into the production processes of our customers and represent a critical piece of their supply chains.

#### Segments

We report our financial results in four distinct reportable segments: contract logistics, intermodal, trucking, and company-managed brokerage.

Operations aggregated in our contract logistics segment deliver value-added and/or dedicated transportation services to support in-bound logistics to original equipment manufacturers (OEMs) and major retailers on a contractual basis, generally pursuant to terms of one year or longer. Our intermodal segment is associated with local and regional drayage moves coordinated by company-managed terminals using a mix of owner-operators, company equipment and third-party capacity providers (broker carriers). Operations aggregated in our trucking segment are associated with individual freight shipments coordinated by our agents and company-managed terminals using a mix of owner-operators, company equipment and broker carriers. Our company-managed brokerage segment provides for the pick-up and delivery of individual freight shipments using broker carriers, coordinated by our company-managed operations.

For additional information on segments, see Item 8, Note 19 to the Consolidated Financial Statements.

#### **COVID-19 Pandemic**

The Company remains committed to doing its part to protect its employees, customers, vendors and the general public from the spread of the coronavirus outbreak (COVID-19). Our operational and financial performance were negatively impacted during the latter part of the first and most of the second quarter of 2020. To mitigate the impact on our business, we implemented numerous cost reduction efforts including furloughing a large portion of our direct labor force, requiring personnel to take unpaid time-off, restricting travel, reducing discretionary spending, and various other measures. During the third quarter 2020, we experienced a rebound in demand for transportation and manufacturing support services and experienced a more normalized level of business activity. Although we estimate COVID-19 had the largest impact on our business during the second quarter 2020, we are unable to predict with any certainty the future impact COVID-19 may have on our operational and financial performance. The ultimate magnitude of COVID-19, including the extent of its impact on the Company's financial and operating results, which could be material, will be determined by the length of time the pandemic continues, its severity, government regulations imposed in response to the pandemic, and to its general effect on the economy and transportation demand.

#### **Business and Growth Strategy**

The key elements of our strategy are as follows:

*Make strategic acquisitions.* The transportation and logistics industry is highly fragmented, with hundreds of small and mid-sized competitors that are either specialized in specific vertical markets, specific service offerings, or limited to local and regional coverage. We expect to selectively evaluate and pursue acquisitions that will enhance our service capabilities, expand our geographic network and/or diversify our customer base.

*Expand our network of agents and owner-operators*. Increasing the number of agents and owner-operators has been a driver of our historical growth in transactional transportation services. We intend to continue to recruit qualified agents and owner-operators in order to penetrate new markets and expand our operations in existing markets. Our agents typically focus on a small number of shippers in a particular market and are attuned to the specific transportation needs of that core group of shippers, while remaining alert to growth opportunities.

Continue to capitalize on strong industry fundamentals and outsourcing trends. We believe long-term industry growth will be supported by manufacturers seeking to outsource non-core logistics functions to cost-effective third-party providers that can efficiently manage increasingly complex global supply chains. We intend to leverage our integrated suite of transportation and logistics services, our network of facilities, our long-term customer relationships, and our reputation for operational excellence to capitalize on favorable industry fundamentals and growth expectations.

Target further penetration of key customers in the North American automotive industry. The automotive industry is one of the largest users of global outsourced logistics services, providing us growth opportunities with both existing and new customers. Of our customers generating revenues greater than \$100,000 per year, this sector comprised approximately 29% of operating revenues in 2020. We intend to capitalize on anticipated continued growth in outsourcing of higher value logistics services in the automotive sector such as sub-assembly and sequencing, which link directly into production lines and require specialized capabilities, technological expertise and strict quality controls.

Continue to expand penetration in other vertical markets. We have a history of providing highly complex value-added logistics services to automotive and other industrial customers. We have developed standardized, modular systems for material handling processes and have extensive experience in rapid implementation and workforce training. These capabilities and our broad portfolio of logistics services are transferable across vertical markets. We believe we can leverage the expertise we initially developed in the automotive sector. In addition to automotive, our targeted industries include aerospace, energy, government services, healthcare, industrial retail, consumer goods, and steel and metals.

#### **Competition and Industry**

The transportation and logistics service industry is highly competitive and extremely fragmented. We compete based on quality and reliability of service, price, breadth of logistics solutions, and IT capabilities. We compete with asset and non-asset based truckload and less-than-truckload carriers, intermodal transportation, logistics providers and, in some aspects of our business, railroads. We also compete with other motor carriers for owner-operators and agents.

Our customers may choose not to outsource their logistics operations and, rather, to retain or restore such activities as their own internal operations. In our largest vertical market, the automotive industry, we compete more frequently with a relatively small number of privately-owned firms or with subsidiaries of large public companies. These vendors have the scope and capabilities to provide the breadth of services required by the large and complex supply chains of automotive original equipment manufacturers (OEMs).

We also encounter competition from regional and local third-party logistics providers, integrated transportation companies that operate their own aircraft, cargo sales agents and brokers, surface freight forwarders and carriers, airlines, associations of shippers organized to consolidate their members' shipments to obtain lower freight rates, and internet-based freight exchanges.

The transportation industry is continuously impacted by new rules and regulations intended to improve the overall safety of the industry. Compliance with such increasingly complex rules continues to constrain the supply of qualified drivers. We believe that our industry will continue to be hindered by an insufficient quantity of qualified drivers which creates significant competition for this declining pool.

#### **Customers**

Revenue is generated from customers throughout the United States, and in Mexico, Canada and Colombia. Our customers are largely concentrated in the automotive, steel, oil and gas, alternative energy and manufacturing industries.

A significant percentage of our revenues is derived from the domestic auto industry. Of our customers generating revenues greater than \$100,000 per year, aggregate sales in the automotive industry totaled 29%, 27% and 36% of revenues during the fiscal years ended December 31, 2020, 2019 and 2018, respectively. During 2020, 2019 and 2018, General Motors accounted for approximately 14%, 12% and 13% of our total operating revenues, respectively. Sales to our top 10 customers, including General Motors, totaled 38% in 2020. A significant percentage of our revenue also results from our providing capacity to other transportation companies that aggregate loads from a variety of shippers in these and other industries.

### **Human Capital Resources**

*Overview*. As of December 31, 2020, we had 6,187 employees. During the year ended December 31, 2020, we also engaged, on average, the full-time equivalency of 1,233 individuals on a contract basis. As of December 31, 2020, approximately 33% of our employees in the United States, Canada, and Colombia and 87% of our employees in Mexico were members of unions and subject to collective bargaining agreements. We believe our union and employee relationships are good.

Diversity and Inclusion. We believe diversity, equity, and inclusion are critical to our ability to win in the marketplace and enable our workforce and communities to succeed. Specifically, having a diverse and inclusive workplace allows us to attract and retain the best employees to deliver results for our shareholders. A qualified, diverse, and inclusive workforce also helps us represent the broad cross-section of ideas, values, and beliefs of our employees, customers, and communities. Our commitment to diversity and inclusion means that we will continue to strive to establish and improve an inclusive workplace environment where employees from all backgrounds can succeed and be heard.

Employee Health and Safety. We are committed to being an industry leader in health and safety standards. The physical health, wellbeing, and mental health of our employees is crucial to our success. Most recently, our primary concern during the COVID-19 pandemic has been to do our part to protect our employees, customers, vendors, and the general public from the spread of the virus while continuing to serve the vital role of supplying essential goods to the nation. Where possible, our employees are working remotely from their homes. For essential functions, including our plant workers and driving professionals, we have distributed cleaning and protective supplies to various plants and terminals so that they are available to those that need them, increased cleaning frequency and coverage, and provided employees direction on precautionary measures, such as sanitizing truck interiors, personal hygiene, and social distancing. We will continue to adapt our operations as required to ensure safety while continuing to provide a high level of service to our customers.

Talent Acquisition, Retention and Development. We continually strive to hire, develop, and retain the top talent in our industry. Critical to attracting and retaining top talent is employee satisfaction, and we regularly implement programs to increase employee satisfaction. We reward our employees by providing competitive compensation, benefits, and incentives throughout all levels in our organization. Intense competition in the transportation and logistics services industry for qualified workers and drivers has resulted in additional expense to recruit and retain an adequate supply of employees and has had a negative impact on the industry. Our operations have also been impacted, we have periodically experienced under-utilization and increased expenses due to a shortage of qualified workers and drivers. We place a high priority on the recruitment and retention of an adequate supply of qualified workers and drivers

## **Independent Contractor Network**

We utilize a network of agents and owner-operators located throughout the United States and in Ontario, Canada. These agents and owner-operators are independent contractors.

A significant percentage of the interaction with our shippers is provided by our agents. Our agents solicited and controlled approximately 30% of the freight we hauled in 2020, with the balance of the freight being generated by company-managed terminals. Our top 100 agents in 2020 generated approximately 20% of our annual operating revenues. Our agents typically focus on three or four shippers within a particular market and solicit most of their freight business from this core group. By focusing on a relatively small number of shippers, each agent is acutely aware of the specific transportation needs of that core group of shippers, while remaining alert to growth opportunities.

We also contract with owner-operators to provide greater flexibility in responding to fluctuations in customer demand. Owner-operators provide their own trucks and are contractually responsible for all associated expenses, included financing costs, fuel, maintenance, insurance, and taxes, among other things. They are also responsible for maintaining compliance with Federal Motor Carrier Safety Administration regulations.

### **Revenue Equipment**

The following table represents our equipment used to provide transportation services as of December 31, 2020:

	Company- owned or	Owner- Operator	
Type of Equipment	Leased	Provided	Total
Tractors	1,524	2,718	4,242
Yard Tractors	227	-	227
Trailers	3,700	1,025	4,725
Chassis	2,420	1	2,421
Containers	334	-	334

# **Risk Management and Insurance**

Our customers and federal regulations generally require that we provide insurance for auto liability and general liability claims up to \$1.0 million per occurrence. Accordingly, in the United States, we purchase such insurance from a licensed casualty insurance carrier, which is a related party, providing a minimum \$1.0 million of coverage for individual auto liability and general liability claims. We are generally self-insured for auto and general liability claims above \$1.0 million unless riders are sought to satisfy individual customer or vendor contract requirements. In certain of our businesses, we have secured additional auto liability coverage where we are self-insured for claims above \$7.0 million. In Mexico, our operations and investment in equipment are insured through an internationally recognized, third-party insurance underwriter.

We typically self-insure for the risk of motor cargo liability claims and material handling claims. Accordingly, we establish financial reserves for anticipated losses and expenses related to motor cargo liability and material handling claims, and we periodically evaluate and adjust those reserves to reflect our experience. Any such adjustments could have a materially adverse effect on our operations and financial results.

To reduce our exposure to claims incurred while a vehicle is being operated without a trailer attached or is being operated with an attached trailer which does not contain or carry any cargo, we require our owner-operators to maintain non-trucking use liability coverage (which the industry refers to as deadhead bobtail coverage) of \$2.0 million per occurrence.

In brokerage arrangements, our exposure to liability associated with accidents incurred by other third-party carriers who haul freight on our behalf is reduced by various factors, including the extent to which the third party providers maintain their own insurance coverage.

#### **Technology**

We use multifaceted software tools and hardware platforms that support seamless integration with the IT networks of our customers and vendors through electronic data exchange systems. These tools enhance our relationships and ability to effectively communicate with customers and vendors. Our tools and platforms provide real-time, web-based visibility into the supply chains of our customers.

In our contract logistics segment, we customize our proprietary Warehouse Management System (WMS) to meet the needs of individual customers. Our WMS allows us to send our customers an advance shipping notice through a simple, web-based interface that can be used by a variety of vendors. It also enables us to clearly identify and communicate to the customer any vendor-related problems that may cause delays in production. We also use cross-dock and container-return-management applications that automate the cycle of material receipt and empty container return.

Our proprietary and third-party transportation management system allows full operational control and visibility from dispatch to delivery, and from invoicing to receivables collections. For our employee drivers, the system provides automated dispatch to hand-held devices, satellite tracking for quality control and electronic status broadcasts to customers when requested. Our international and domestic air freight and ocean forwarding services use similar systems with added functionalities for managing air and ocean freight transportation requirements. All of these systems have customer-oriented web interfaces that allow for full shipment tracking and visibility, as well as for customer shipment input. We also provide systems that allow agents to list pending freight shipments and owner-operators with available capacity and track particular shipments at various points in the shipping route.

We believe that these tools improve our services and quality controls, strengthen our relationships with our customers, and enhance our value proposition. Any significant disruption or failure of these systems could have a materially adverse effect on our operations and financial results.

### **Government Regulation**

Our operations are regulated and licensed by various U.S. federal and state agencies, as well as comparable agencies in Mexico, Canada, and Colombia. Interstate motor carrier operations are subject to the broad regulatory powers, to include drug and alcohol testing, safety and insurance requirements, prescribed by the Federal Motor Carrier Safety Administration (FMCSA), which is an agency of the U.S. Department of Transportation (DOT). Matters such as weight and equipment dimensions also are subject to United States federal and state regulation. We operate in the United States under operating authority granted by the DOT. We are also subject to regulations relating to testing and specifications of transportation equipment and product handling requirements. In addition, our drivers and owner-operators must have a commercial driver's license and comply with safety and fitness regulations promulgated by the FMCSA, including those relating to drug and alcohol testing.

Our international operations, which include not only facilities in Mexico, Canada and Colombia but also transportation shipments managed by our specialized service operations, are impacted by a wide variety of U.S. government regulations and applicable international treaties. These include regulations of the U.S. Department of State, U.S. Department of Commerce, and the U.S. Department of Treasury. Regulations also cover specific commodities, destinations and end-users. Part of our specialized services operations is engaged in the arrangement of imported and exported freight. As such, we are subject to the regulations of the U.S. Customs and Border Protection, which include significant notice and registration requirements. In various Canadian provinces, we operate transportation services under authority granted by the Ministries of Transportation and Communications.

Transportation-related regulations are greatly affected by U.S. national security legislation and related regulations. We believe we comply with applicable material regulations and that the costs of regulatory compliance are an ordinary operating cost of our business that we may not be able to recoup from rates charged to customers.

#### **Environmental Regulation**

We are subject to various federal, state and local environmental laws and regulations that focus on, among other things: the emission and discharge of hazardous materials into the environment or their presence at our properties or in our vehicles; fuel storage tanks; transportation of certain materials; and the discharge or retention of storm water. Under specific environmental laws, we could also be held responsible for any costs relating to contamination at our past or present facilities and at third-party waste disposal sites, as well as costs associated with cleanup of accidents involving our vehicles. We do not believe that the cost of future compliance with current environmental laws or regulations will have a material adverse effect on our operations, financial condition, competitive position or capital expenditures for fiscal year 2021. However, future changes to laws or regulations may adversely affect our operations and could result in unforeseen costs to our business.

#### Seasonality

Generally, demand for our value-added services delivered to existing customers increases during the second calendar quarter of each year as a result of the automotive industry's spring selling season. Conversely, such demand generally decreases during the third quarter of each year due to the impact of scheduled OEM customer plant shutdowns in July for vacations and changeovers in production lines for new model years.

Our value-added services business is also impacted in the fourth quarter by plant shutdowns during the December holiday period. However, due to the COVID-19 pandemic and its impact on North American automotive manufacturing, we may not experience normal seasonal demand for our services supporting the automotive production and selling cycles during the current year.

Our transportation services business is generally impacted by decreased activity during the post-holiday winter season and, in certain states, during hurricane season. At these times, some shippers reduce their shipments, and inclement weather impedes trucking operations or underlying customer demand.

Prolonged adverse weather conditions, particularly in winter months, can also adversely impact margins due to productivity declines and related challenges meeting customer service requirements.

#### **Available Information**

We make available free of charge on or through our website, www.universallogistics.com, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission (SEC). The contents of our website are not incorporated into this filing.

### ITEM 1A: RISK FACTORS

Set forth below, and elsewhere in this Report and in other documents we file with the SEC, are risks and uncertainties that could cause our actual results to differ materially from the results contemplated by the forward-looking statements contained in this Report.

# **Risks Related to Our Industry**

Our business is subject to general economic and business factors that are largely beyond our control, any of which could have a material adverse effect on our operating results.

Our business is dependent upon a number of general economic and business factors that may adversely affect our results of operations. These factors include significant increases or rapid fluctuations in fuel prices, excess capacity in the transportation and logistics industry, surpluses in the market for used equipment, interest rates, fuel taxes, license and registration fees, insurance premiums, self-insurance levels, and difficulty in attracting and retaining qualified drivers and independent contractors.

We operate in a highly competitive and fragmented industry, and our business may suffer if we are unable to adequately address any downward pricing pressures or other factors that may adversely affect our ability to compete with other carriers.

Further, we are affected by recessionary economic cycles and downturns in customers' business cycles, particularly in market segments and industries, such as the automotive industry, where we have a significant concentration of customers. Economic conditions may also adversely affect our customers and their ability to pay for our services.

Deterioration in the United States and world economies could exacerbate any difficulties experienced by our customers and suppliers in obtaining financing, which, in turn, could materially and adversely impact our business, financial condition, results of operations and cash flows.

We operate in the highly competitive and fragmented transportation and logistics industry, and our business may suffer if we are unable to adequately address factors that may adversely affect our revenue and costs relative to our competitors.

Numerous competitive factors could impair our ability to maintain our current profitability. These factors include the following:

- we compete with many other truckload carriers and logistics companies of varying sizes, some of which have more equipment, a broader coverage network, a wider range of services and greater capital resources than we do;
- some of our competitors periodically reduce their rates to gain business, especially during times of reduced growth rates in the economy, which may limit our ability to maintain or increase rates, maintain our operating margins, or maintain significant growth in our business;
- many customers reduce the number of carriers they use by selecting so-called "core carriers" as approved service providers and, in some instances, we may not be selected;
- some companies hire lead logistics providers to manage their logistics operations, and these lead logistics providers may hire logistics providers on a non-neutral basis which may reduce the number of business opportunities available to us;
- many customers periodically accept bids from multiple carriers and providers for their shipping and logistic service needs, and this process may result in the loss of some of our business to competitors and/or price reductions;
- the trend toward consolidation in the trucking and third-party logistics industries may create other large providers with greater financial resources and other competitive advantages relating to their size and with whom we may have difficulty competing;
- advances in technology require increased investments to remain competitive, and our customers may not be willing to accept higher rates to
  cover the cost of these investments;
- · competition from Internet-based and other brokerage companies may adversely affect our relationships with our customers and freight rates;
- economies of scale that may be passed on to smaller providers by procurement aggregation providers may improve the ability of smaller providers to compete with us;
- · some areas of our service coverage require trucks with engines no older than 2011 in order to comply with environmental rules; and
- an inability to continue to access capital markets to finance equipment acquisition could put us at a competitive disadvantage.

## We may be adversely impacted by fluctuations in the price and availability of diesel fuel.

Diesel fuel represents a significant operating expense for the Company, and we do not currently hedge against the risk of diesel fuel price increases. An increase in diesel fuel prices or diesel fuel taxes, or any change in federal or state regulations that results in such an increase, could have a material adverse effect on our operating results to the extent we are unable to recoup such increases from customers in the form of increased freight rates or through fuel surcharges. Historically, we have been able to offset, to a certain extent, diesel fuel price increases through fuel surcharges to our customers, but we cannot be certain that we will be able to do so in the future. We continuously monitor the components of our pricing, including base freight rates and fuel surcharges, and address individual account profitability issues with our customers when necessary. While we have historically been able to adjust our pricing to help offset changes to the cost of diesel fuel through changes to base rates and/or fuel surcharges, we cannot be certain that we will be able to do so in the future.

## Difficulty in attracting drivers could affect our profitability and ability to grow.

The transportation industry routinely experiences difficulty in attracting and retaining qualified drivers, including independent contractors, resulting in intense competition for drivers. We have from time to time experienced under-utilization and increased expenses due to a shortage of qualified drivers. If we are unable to attract drivers when needed or contract with independent contractors when needed, we could be required to further adjust our driver compensation packages, increase driver recruiting efforts, or let trucks sit idle, any of which could adversely affect our growth and profitability.

Purchase price increases for new revenue equipment and/or decreases in the value of used revenue equipment could have an adverse effect on our results of operations, cash flows and financial condition.

During the last decade, the purchase price of new revenue equipment has increased significantly as equipment manufacturers recover increased materials costs and engine design costs resulting from compliance with increasingly stringent EPA engine emission standards. Additional EPA emission mandates in the future could result in higher purchase prices of revenue equipment which could result in higher than anticipated depreciation expenses. If we were unable to offset any such increase in expenses with freight rate increases, our cash flows and results of operations could be adversely affected. If the market price for used equipment continues to decline, then we could incur substantial losses upon disposition of our revenue equipment which could adversely affect our results of operations and financial condition.

We have significant ongoing capital requirements that could affect our liquidity and profitability if we are unable to generate sufficient cash from operations or obtain sufficient financing on favorable terms.

The transportation and logistics industry is capital intensive. If we are unable to generate sufficient cash from operations in the future, we may have to limit our growth, enter into unfavorable financing arrangements, or operate our revenue equipment for longer periods, any of which could have a material adverse effect on our profitability.

We operate in a highly regulated industry and increased costs of compliance with, or liability for violation of, existing or future regulations could have a material adverse effect on our business.

The U.S. Federal Motor Carrier Safety Administration, or FMCSA, and various state and local agencies exercise broad powers over our business, generally governing such activities as authorization to engage in motor carrier operations, drug and alcohol testing, safety and insurance requirements. Our owner-operators must comply with the safety and fitness regulations promulgated by the FMCSA, including those relating to drug and alcohol testing and hours-of-service. There also are regulations specifically relating to the trucking industry, including testing and specifications of equipment and product handling requirements. These measures could disrupt or impede the timing of our deliveries and we may fail to meet the needs of our customers. The cost of complying with these regulatory measures, or any future measures, could have a materially adverse effect on our business or results of operations.

A determination that owner-operators are employees, rather than independent contractors, could expose us to various liabilities and additional costs.

Federal and state legislation as well as tax and other regulatory authorities often seek to assert that independent contractors in the transportation service industry, such as our owner-operators, are employees rather than independent contractors. For example, on September 18, 2019, the state of California passed Assembly Bill 5 (AB5) which codified a standard test for determining a worker's status as an employee or independent contractor for purposes of determining employee benefits such as paid vacation, sick leave, meals and rest breaks, and overtime, known as the ABC test. The ABC test is generally thought to lower the threshold for classifying a worker as an employee as opposed to an independent contractor. AB 5 was scheduled to go into effect on January 1, 2020; however, a California Federal District judge issued a preliminary injunction enjoining California from enforcing AB 5 as to motor carriers. California can appeal the decision to grant the preliminary injunction.

While new in California, versions of the ABC test have existed in a number of other states over the years and have been challenged in various courts as violating the federal government's exclusive right to regulate motor carriers in interstate commerce. There can be no assurance that these interpretations and tax laws that consider these persons independent contractors will not change, that other federal or state legislation will not be enacted or that various authorities will not successfully assert a position that reclassifies independent contractors to be employees. If our owner-operators are determined to be our employees, that determination could materially increase our exposure under a variety of federal and state tax, workers' compensation, unemployment benefits, labor, employment, and tort laws, as well as our potential liability for employee benefits. In addition, such changes may be applied retroactively, and if so, we may be required to pay additional amounts to compensate for prior periods. Any of the above increased costs would adversely affect our business and operating results.

#### We may incur additional operating expenses or liabilities as a result of potential future requirements to address climate change issues.

Federal, state, and local governments, as well as some of our customers, are beginning to respond to global warming issues. This increased focus on sustainability may result in new legislation or regulations and customer requirements that could negatively affect us as we may incur additional costs or be required to make changes to our operations in order to comply with any new regulations or customer requirements. Legislation or regulations that potentially impose restrictions, caps, taxes, or other controls on emissions of greenhouse gases such as carbon dioxide, a by-product of burning fossil fuels such as those used in the Company's trucks, could adversely affect our operations and financial results. More specifically, legislative, or regulatory actions related to climate change could adversely impact the Company by increasing our fuel costs and reducing fuel efficiency and could result in the creation of substantial additional capital expenditures and operating costs in the form of taxes, emissions allowances, or required equipment upgrades. Any of these factors could impair our operating efficiency and productivity and result in higher operating costs. In addition, revenues could decrease if we are unable to meet regulatory or customer sustainability requirements. These additional costs, changes in operations, or loss of revenues could have a material adverse effect on our business, financial condition, and results of operations.

#### **Risks Related to Our Business**

#### The coronavirus outbreak or other similar outbreaks could negatively impact our financial condition, liquidity, results of operations, and cash flows.

The outbreak of the novel coronavirus (COVID-19), and any other outbreaks of contagious diseases or other adverse public health developments, could have a materially adverse effect on our financial condition, liquidity, results of operations, and cash flows. The rapid spread of COVID-19 has resulted in governmental authorities implementing numerous measures to try to contain the virus, such as travel bans and restrictions, quarantines, stay-at-home orders, increased border security and closures. These measures and the public health concerns resulting from the outbreak have severely disrupted economic and commercial activity. The resulting impact on domestic and global supply chains has caused slowdowns and reduced freight demand for transportation companies such as ours. Because we have a significant concentration of customers within the automotive industry, our revenues have been significantly affected by the closure of North American automotive and heavy-truck manufacturing facilities beginning in late March and throughout the second quarter of 2020. Although most automotive and heavy-truck operations have resumed production, additional closures and other consumer activity affecting our customers and any future wave of the virus or other similar outbreaks could further adversely affect our business. A significant portion of our revenue is also provided by a network of agents and owner-operators located throughout the United States and in Ontario, Canada. As the COVID-19 virus continues to spread in areas we service, a significant impact to our network due to illness or government restrictions could have a material adverse effect on our ability to service our customers and on our business and results of operations. In addition, the implementation of measures to protect the health and safety of our employees, customers, vendors, and the general public may disrupt our ability to efficiently manage personnel and operations and to recruit and retain driver and non-driver personnel, which could have a materially adverse effect on our operating results. Further, negative financial results, an economic downturn or uncertainty, or a tightening of credit markets caused by COVID-19 or other similar outbreaks could have a material adverse effect on our liquidity and our ability to effectively meet our short- and long-term financial obligations.

# Our revenue is largely dependent on North American automotive industry production volume and may be negatively affected by future downturns in North American automobile production.

A significant portion of our larger customers are concentrated in the North American automotive industry. For customers generating annual revenues over \$100,000, 29% of our revenues were derived from customers in the North American automotive industry during 2020. Our business and growth largely depend on continued demand for its services from customers in this industry. Any future downturns in North American automobile production, which also impacts our steel and metals customers, could similarly affect our revenues in future periods.

Our business derives a large portion of revenue from a few major customers, and the loss of any one or more of them as customers, or a reduction in their operations, could have a material adverse effect on our business.

A large portion of our revenue is generated from a limited number of major customers concentrated in the automotive, steel and metals, and energy industries. Our top 10 customers accounted for approximately 38% of our operating revenues during 2020. Our contracts with customers generally contain cancellation clauses, and there can be no assurance that these customers will continue to utilize our services or that they will continue at the same levels. Further, there can be no assurance that these customers will not be affected by a future downturn in demand, which would result in a reduction in their operations and corresponding need for our services. Moreover, our customers may individually lose market share, apart from general economic trends. If our major customers lose U.S. market share, they may have less need for services. A reduction in or termination of services by one or more of our major customers could have a material adverse effect on our business and results of operations.

## If we are unable to retain our key employees, our business, financial condition, and results of operations could be harmed.

We are highly dependent upon the services of our key employees and executive officers. The loss of any of their services could have a material adverse effect on our operations and future profitability. We must continue to develop and retain a core group of managers if we are to realize our goal of expanding our operations and continuing our growth. We cannot assure that we will be able to do so.

# A significant labor dispute involving us or one or more of our customers, or that could otherwise affect our operations, could reduce our revenues, and harm our profitability.

A substantial number of our employees and of the employees of our largest customers are members of industrial trade unions and are employed under the terms of collective bargaining agreements. Each of our unionized facilities has a separate agreement with the union that represents the workers at only that facility. During 2019, a labor strike by the United Auto Workers of its employees at the facilities of our largest customer, General Motors, caused an extended shutdown of General Motors' manufacturing operations and, in turn, materially and adversely impacted our operating results during the third and fourth quarters of 2019. Any future labor disputes involving either us or our customers could similarly affect our operations. If the UAW and our automotive customers and their suppliers are unable to negotiate new contracts in the future and our customers' plants experience slowdowns or closures as a result, our revenue and profitability could be negatively impacted. A labor dispute involving another supplier to our customers that results in a slowdown or closure of our customers' plants to which we provide services could also have a material adverse effect on our business. Significant increases in labor costs as a result of the renegotiation of collective bargaining agreements could also be harmful to our business and our profitability. As of December 31, 2020, approximately 33% of our employees in the United States, Canada, and Colombia, and 87% of our employees in Mexico were members of unions and subject to collective bargaining agreements.

In addition, strikes, work stoppages and slowdowns by our employees may affect our ability to meet our customers' needs, and customers may do more business with competitors if they believe that such actions may adversely affect our ability to provide service. We may face permanent loss of customers if we are unable to provide uninterrupted service. The terms of our future collective bargaining agreements also may affect our competitive position and results of operations.

#### Ongoing insurance and claims expenses could significantly reduce our earnings and cash flows.

Our future insurance and claims expenses might exceed historical levels, which could reduce our earnings and cash flows. The Company is self-insured for health and workers' compensation insurance coverage up to certain limits. If medical costs continue to increase, or if the severity or number of claims increase, and if we are unable to offset the resulting increases in expenses with higher freight rates, our earnings could be materially and adversely affected.

#### We face litigation risks that could have a material adverse effect on the operation of our business.

We face litigation risks regarding a variety of issues, including without limitation, accidents involving our trucks and employees, alleged violations of federal and state labor and employment laws, securities laws, environmental liability, and other matters. These proceedings may be time-consuming, expensive, and disruptive to normal business operations. The defense of such lawsuits could result in significant expense and the diversion of our management's time and attention from the operation of our business. In recent years, several insurance companies have stopped offering coverage to trucking companies as a result of increases in the severity of automobile liability claims and higher costs of settlements and verdicts. Recent jury awards in the trucking industry have reached into the tens and even hundreds of millions of dollars. Trends in such awards, commonly referred to as nuclear verdicts, could adversely affect our ability to obtain suitable insurance coverage or could significantly increase our cost for obtaining such coverage, which would adversely affect our financial condition, results of operations, liquidity, and cash flows. Costs we incur to defend or to satisfy a judgment or settlement of these claims may not be covered by insurance or could exceed the amount of that coverage or increase our insurance costs and could have a material adverse effect on our financial condition, results of operations, liquidity, and cash flows.

# We have a significant amount of debt, which could restrict our growth, place us at a competitive disadvantage or otherwise materially adversely affect our financial health.

Our significant debt levels could have important consequences such as the following:

- impair our ability to obtain additional future financing for working capital, capital expenditures, acquisitions, or general corporate expenses;
- limit our ability to use operating cash flow in other areas of our business due to the necessity of dedicating a substantial portion of these funds for payments on our indebtedness;
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;

- make it more difficult for us to satisfy our obligations;
- increase our vulnerability to general adverse economic and industry conditions; and
- place us at a competitive disadvantage compared to our competitors.

Our ability to make scheduled payments on, or to refinance, our debt and other obligations will depend on our financial and operating performance, which, in turn, is subject to our ability to implement our strategic initiatives, prevailing economic conditions and certain financial, business, and other factors beyond our control. If our cash flow and capital resources are insufficient to fund our debt service and other obligations, we may be forced to reduce or delay expansion plans and capital expenditures, sell material assets or operations, obtain additional capital, or restructure our debt. We cannot provide any assurance that our operating performance, cash flow and capital resources will be sufficient to pay our debt obligations when they become due. We also cannot provide assurance that we would be able to dispose of material assets or operations or restructure our debt or other obligations if necessary or, even if we were able to take such actions, that we could do so on terms that are acceptable to us.

Disruptions in the credit markets may adversely affect our business, including the availability and cost of short-term funds for liquidity requirements and our ability to meet long-term commitments, which could adversely affect our results of operations, cash flows and financial condition.

If cash from operations is not sufficient, we may be required to rely on the capital and credit markets to meet our financial commitments and short-term liquidity needs. Disruptions in the capital and credit markets, as have been experienced during recent years, could adversely affect our ability to draw on our revolving credit facilities. Our access to funds under the credit facilities is dependent on the ability of banks to meet their funding commitments. A bank may not be able to meet their funding commitments if they experience shortages of capital and liquidity or if they experience excessive volumes of borrowing requests from other borrowers within a short period of time.

Longer term disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation, reduced alternatives, or failures of significant financial institutions could adversely affect our access to liquidity needed for our business. Any disruption could require us to take measures to conserve cash until the markets stabilize or until alternative credit arrangements or other funding for our business needs can be arranged, which could adversely affect our growth and profitability.

We have substantial fixed costs and, as a result, our operating income fluctuates disproportionately with changes in our net sales.

A significant portion of our expenses are fixed costs that that neither increase nor decrease proportionately with sales. There can be no assurance that we would be able to reduce our fixed costs proportionately in response to a decline in our sales and therefore our competitiveness could be significantly impacted. As a result, a decline in our sales would result in a higher percentage decline in our income from operations and net income.

Further changes in U.S. tax laws and regulations may impact our effective tax rate and may adversely affect our business, financial condition, and operating results.

The Tax Cuts and Jobs Act had a favorable impact on our effective tax rate and our net income for 2018. We also have benefited from certain other tax provisions, such as those relating to capital expenditure deductions. However, future changes in the U.S. tax laws, including any changes related to capital expenditure deductions or any significant changes to federal tax rates, interest expense deductions, or the taxation of business entities, could have a materially adverse effect on our growth opportunities, business, and results of operations.

### Our results of operations may be affected by seasonal factors.

Our productivity may decrease during the winter season when severe winter weather impedes operations. Also, some shippers may reduce their shipments after the winter holiday season. At the same time, operating expenses may increase, and fuel efficiency may decline due to engine idling during periods of inclement weather. Harsh weather conditions generally also result in higher accident frequency, increased freight claims, and higher equipment repair expenditures. Generally, demand for our value-added services delivered to existing customers increases during the second calendar quarter of each year as a result of the automotive industry's spring selling season and decreases during the third quarter of each year due to the impact of scheduled OEM customer plant shutdowns in July for vacations and changeovers in production lines for new model years. Our value-added services business is also impacted in the fourth quarter by plant shutdowns during the December holiday period.

## Our operations are subject to various environmental laws and regulations, the violation of which could result in substantial fines or penalties.

We are subject to various environmental laws and regulations dealing with the handling of hazardous materials, underground fuel storage tanks, and discharge and retention of storm-water. We operate in industrial areas, where truck terminals and other industrial activities are located, and where groundwater or other forms of environmental contamination could occur. In prior years, we also maintained bulk fuel storage and fuel islands at two of our facilities. Our operations may involve the risks of fuel spillage or seepage, environmental damage, and hazardous waste disposal, among others. If we are involved in a spill or other accident involving hazardous substances, or if we are found to be in violation of applicable laws or regulations, it could have a materially adverse effect on our business and operating results. If we should fail to comply with applicable environmental regulations, we could be subject to substantial fines or penalties and to civil and criminal liability.

#### Our business may be disrupted by natural disasters and severe weather conditions causing supply chain disruptions.

Natural disasters such as earthquakes, tsunamis, hurricanes, tornadoes, floods or other adverse weather and climate conditions, whether occurring in the United States or abroad, could disrupt our operations or the operations of our customers or could damage or destroy infrastructure necessary to transport products as part of the supply chain. Specifically, these events may damage or destroy or assets, disrupt fuel supplies, increase fuel costs, disrupt freight shipments or routes, and affect regional economies. As a result, these events could make it difficult or impossible for us to provide logistics and transportation services; disrupt or prevent our ability to perform functions at the corporate level; and/or otherwise impede our ability to continue business operations in a continuous manner consistent with the level and extent of business activities prior to the occurrence of the unexpected event, which could adversely affect our business and results of operations or make our results more volatile.

#### Our information technology systems are subject to certain cyber risks and disasters that are beyond our control.

We depend heavily on the proper functioning and availability of our information, communications, and data processing systems, including operating and financial reporting systems, in operating our business. Our systems and those of our technology and communications providers are vulnerable to interruptions caused by natural disasters, power loss, telecommunication and internet failures, cyber-attack, and other events beyond our control. Accordingly, information security and the continued development and enhancement of the controls and processes designed to protect our systems, computers, software, data and networks from attack, damage or unauthorized access remain a priority for us.

We have been, and in the future may be, subject to cybersecurity and malware attacks and other intentional hacking. Any failure to identify and address or to prevent a cyber- or malware-attack could result in service interruptions, operational difficulties, loss of revenues or market share, liability to our customers or others, the diversion of corporate resources, injury to our reputation and increased service and maintenance costs. In June 2020, we experienced a ransomware cyber-attack affecting certain of our network systems. The investigation into the attack is on-going, including the scope of transferred or extracted data, and continuing to assess the financial and other effects of this incident, which could have an adverse impact on our business, results of operations and reputation.

Although our information systems are protected through physical and software security as well as redundant backup systems, they remain susceptible to cyber security risks. Some of our software systems are utilized by third parties who provide outsourced processing services which may increase the risk of a cyber-security incident. We have invested and continue to invest in technology security initiatives, employee training, information technology risk management and disaster recovery plans. The development and maintenance of these measures is costly and requires ongoing monitoring and updating as technologies change and efforts to overcome security measures become increasingly more sophisticated. Despite our efforts, we are not fully insulated from data breaches, technology disruptions or data loss, which could adversely impact our competitiveness and results of operations.

Any future successful cyber-attack or catastrophic natural disaster could significantly affect our operating and financial systems and could temporarily disrupt our ability to provide required services to our customers, impact our ability to manage our operations and perform vital financial processes, any of which could have a materially adverse effect on our business.

#### We are subject to certain risks arising from doing business in Mexico.

As we continue to grow our business in Mexico, we are subject to greater risks of doing business internationally, including fluctuations in foreign currencies, changes in the economic strength of Mexico, difficulties in enforcing contractual obligations and intellectual property rights, burdens of complying with a wide variety of international and U.S. export and import laws, and social, political, and economic instability. We also face additional risks associated with our Mexico business, including potential restrictive trade policies and imposition of any import or export tariffs, taxes, duties, or fees, as well as potential disruptions or delays at border crossings due to immigration-related issues or other factors. If we are unable to address business concerns related to our international operations in a timely and cost efficient manner, our financial position, results of operations or cash flows could be adversely affected. The agreement permitting cross border movements for both United States and Mexican based carriers in the United States and Mexico presents additional risks in the form of potential increased competition and the potential for increased congestion in our lanes that cross the border between countries.

#### Our business may be harmed by public health crises, terrorist attacks, future war, or anti-terrorism measures.

The rapid spread of a contagious illness such as the coronavirus, or fear of such an event, could significantly disrupt global and domestic supply chains for our customers or result in various travel restrictions, any of which could have a material adverse effect on our business and results of operations. It is unknown how extensive supply chains may be affected by the currently developing situation with the coronavirus. In addition, in order to prevent terrorist attacks, federal, state, and municipal authorities have implemented and continue to follow various security measures, including checkpoints and travel restrictions on large trucks. Our international operations in Canada and Mexico may be affected significantly if there are any disruptions or closures of border traffic due to security measures. Such measures may have costs associated with them, which, in connection with the transportation services we provide, we or our owner-operators could be forced to bear. Further, a public health crisis, terrorist attack, war, or risk of such an event also may have an adverse effect on the economy. A decline in economic activity could adversely affect our revenue or restrict our future growth. Instability in the financial markets as a result of a health pandemic, terrorism or war also could affect our ability to raise capital. In addition, the insurance premiums charged for some or all of the coverage currently maintained by us could increase dramatically or such coverage could be unavailable in the future.

#### We may be unable to successfully integrate businesses we acquire into our operations.

Integrating businesses we acquire may involve unanticipated delays, costs or other operational or financial problems. Successful integration of the businesses we acquire depends on a number of factors, including our ability to transition acquired companies to our management information systems. In integrating acquired businesses, we may not achieve expected economies of scale or profitability or realize sufficient revenues to justify our investment. We also face the risk that an unexpected problem at one of the companies we acquire will require substantial time and attention from senior management, diverting management's attention from other aspects of our business. We cannot be certain that our management and operational controls will be able to support us as we grow.

### Discontinuation, reform, or replacement of LIBOR may adversely affect our variable rate debt.

Borrowings under our credit facilities are at variable rates of interest, primarily based on London Interbank Offered Rate ("LIBOR"). LIBOR tends to fluctuate based on general interest rates, rates set by the U.S. Federal Reserve Board and other central banks, the supply of and demand for credit in the London interbank market, and general economic conditions. In July 2017, the Financial Conduct Authority in the U.K. announced a desire to phase out LIBOR as a benchmark by the end of 2021. Financial industry working groups are developing replacement rates and methodologies to transition existing agreements that depend on LIBOR as a reference rate; however, we can provide no assurance that market-accepted rates and transition methodologies will be available and finalized at the time of LIBOR cessation. If clear market standards and transition methodologies have not been developed by the time LIBOR becomes unavailable, we may have difficulty reaching agreement on acceptable replacement rates under our credit facilities. If we are unable to negotiate replacement rates on favorable terms, it could have a material adverse effect on our earnings and cash flows.

#### Risks Related to Our Common Stock

We are controlled by Matthew T. Moroun, the Chairman of our Board of Directors. The influence of our public shareholders over significant corporate actions is limited, and Mr. Moroun's interests may conflict with our interests and the interests of other shareholders.

Matthew T. Moroun, certain trusts of which Mr. Moroun serves as trustee, and an entity controlled by Mr. Moroun collectively own approximately 60% of our outstanding common stock. Nora M. Moroun, the mother of Matthew T. Moroun, owns approximately 11% of our outstanding common stock. Since the Moroun family collectively owns nearly 71% of our common stock, the Moroun family controls any action requiring the general approval of our shareholders, including the election of our board of directors, the adoption of amendments to our articles of incorporation and bylaws, and the approval of any merger or sale of substantially all of our assets. So long as the Moroun family continues to own a significant amount of our equity, even if such amount is less than a majority of the outstanding shares of our common stock, the Moroun family will continue to be able to substantially influence the outcome of votes on all matters requiring approval by the shareholders, including our ability to enter into certain corporate transactions. This concentration of ownership could limit the price that some investors might be willing to pay for shares of our common stock.

The interests of the Moroun family could conflict with or differ from our interests or the interests of our other shareholders. For example, the concentration of ownership held by the Moroun family could delay, defer, or prevent a change of control of our Company or impede a merger, takeover or other business combination that may otherwise be favorable for us. Accordingly, the Moroun family could cause us to enter into transactions or agreements of which our other shareholders would not approve or make decisions with which they may disagree. The Moroun family may continue to retain control of us for the foreseeable future and may decide not to enter into a transaction in which shareholders would receive consideration for our common stock that is much higher than the then-current market price of our common stock. In addition, the Moroun family could elect to sell a controlling interest in us to a third-party and our other shareholders may not be able to participate in such transaction or, if they are able to participate in such a transaction, such shareholders may receive less than the then current fair market value of their shares. Any decision regarding their ownership of us that the Moroun family may make at some future time will be in their absolute discretion, subject to applicable laws and fiduciary duties.

# Because the Moroun family owns a controlling interest in us, we are not subject to certain corporate governance standards that apply to other publicly traded companies.

The Moroun family controls a majority of our outstanding common stock. As a result, we are a controlled company under the rules of the NASDAQ Stock Market. The NASDAQ rules state that a company of which more than 50% of the voting power is held by another person or group of persons acting together is a controlled company and may elect not to comply with certain corporate governance requirements, including the requirements that:

- a majority of the board of directors consist of independent directors;
- a nominating and corporate governance committee be composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities; and
- the compensation committee be composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities.

These requirements will not apply to us as long as we remain a controlled company. Accordingly, you may not have the same protections afforded to shareholders of companies that are subject to all of the corporate governance requirements of NASDAQ.

#### Our stock trading volume may not provide adequate liquidity for investors.

Although shares of our common stock are traded on the NASDAQ Global Market, the average daily trading volume in our common stock is less than that of other larger transportation and logistics companies. A public trading market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the marketplace of a sufficient number of willing buyers and sellers of the common stock at any given time. This presence depends on the individual decisions of investors and general economic and market conditions over which we have no control. Given the daily average trading volume of our common stock, significant sales of the common stock in a brief period of time, or the expectation of these sales, could cause a decline in the price of our common stock. Additionally, low trading volumes may limit a shareholder's ability to sell shares of our common stock.

Our ability to pay regular dividends on our common stock is subject to the discretion of our Board of Directors and will depend on, among other things, our financial condition, results of operations, capital requirements, any covenants included in our credit facilities any legal or contractual restrictions on the payment of dividends and other factors the Board of Directors deems relevant.

We have adopted a cash dividend policy which anticipates a total annual dividend of \$0.42 per share of common stock. However, the payment of future dividends will be at the discretion of our Board of Directors and will depend, among other things, on our financial condition, results of operations, capital requirements, any covenants included in our credit facilities, any legal or contractual restrictions on the payment of dividends and other factors the Board of Directors deem relevant. As a consequence of these limitations and restrictions, we may not be able to make, or may have to reduce or eliminate, the payment of dividends on our common stock. For example, due to the uncertainty caused by the COVID-19 pandemic, our Board of Directors temporarily suspended the Company's cash dividend policy. We suspended the policy during the first half of 2020, but it has since been reinstated. Any change in the level of our dividends or the suspension of the payment thereof could adversely affect the market price of our common stock.

### Our articles of incorporation and bylaws have, and under Michigan law are subject to, provisions that could deter or prevent a change of control.

Our articles of incorporation and bylaws contain provisions that might enable our management to resist a proposed takeover of our Company. These provisions could discourage, delay, or prevent a change of control of our Company or an acquisition of our Company at a price that our shareholders may find attractive. These provisions also may discourage proxy contests and make it more difficult for our shareholders to elect directors and take other corporate actions. The existence of these provisions could limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions include:

- a requirement that special meetings of our shareholders may be called only by our Board of Directors, the Chairman of our Board of Directors, our Chief Executive Officer, or the holders of a majority of our outstanding common stock;
- advance notice requirements for shareholder proposals and nominations;
- the authority of our Board of Directors to issue, without shareholder approval, preferred stock with such terms as the Board of Directors may determine, including in connection with our implementation of any shareholders rights plan; and
- an exclusive forum bylaw provision requiring that any derivative action brought on behalf of the corporation, any action asserting a claim of breach of a legal or fiduciary duty and any similar claim under the Michigan Business Corporation Act or our articles of incorporation must be brought exclusively in the Circuit Court of the County of Macomb in the State of Michigan or the United States District Court for the Eastern District of Michigan, Southern Division.

In addition, certain provisions of Michigan law that apply to us could discourage or prevent a change of control or acquisition of our Company.

# Ineffective internal control over financial reporting could result in errors in our financial statements, reduce investor confidence, and adversely impact our stock price.

As discussed in Part II, Item 9A "Management's Report on Internal Control Over Financial Reporting" later in this report, in the fourth quarter of 2020, we identified a material weakness in internal controls over the completeness of lease obligations, which resulted in an immaterial error in our previously issued 2019 financial statements. The immaterial error related to a facility lease in Mexico that was amended in 2019 to extend the lease, but the resulting increase in the right-of-use asset and corresponding lease liability were not recorded in the 2019 financial statements. For additional information, see Item 8, Notes 1 and 13 to the Consolidated Financial Statements. Internal controls related to the accounting for our facility lease obligations are important to accurately reflect our financial position and results of operations in our financial reports. We are in the process of remediating the material weakness, but our efforts may not be successful. To remediate the material weakness, we will modify policies and procedures for the review, approval, and application of generally accepted accounting principles to, and disclosure with respect to, facility lease obligations. If we are unable to remediate the material weakness in an appropriate and timely manner, or if we identify additional control deficiencies that individually or together constitute significant deficiencies or material weaknesses, our ability to accurately record, process, and report financial information and consequently, our ability to prepare financial statements within required time periods, could be adversely affected. Failure to maintain effective internal control over financial reporting could result in violations of applicable securities laws, stock exchange listing requirements, and the covenants under our debt agreements, subject us to litigation and investigations, negatively affect investor confidence in our financial statements, and adversely impact our stock price and ability to access capital markets.

#### ITEM 1B: UNRESOLVED SECURITIES & EXCHANGE COMMISSION STAFF COMMENTS

None.

#### ITEM 2: PROPERTIES

We are headquartered and maintain our corporate administrative offices in Warren, Michigan. We own our corporate administrative offices, as well as 23 terminal yards and other properties in the following locations: Dearborn, Michigan; Romulus, Michigan; Riverside, California; Jacksonville, Florida; Garden City, Georgia; Harvey, Illinois; Gary, Indiana; Louisville, Kentucky; Albany, Missouri; Rural Hall, North Carolina; South Kearny, New Jersey; Cleveland, Ohio; Columbus, Ohio; Reading, Ohio; Latty, Ohio; York County, Pennsylvania; Wall, Pennsylvania; Mount Pleasant, South Carolina; Memphis, Tennessee; Dallas, Texas; Houston, Texas; Millwood, West Virginia and Clearfield, Utah.

As of December 31, 2020, we also leased 89 operating, terminal and yard, and administrative facilities in various U.S. cities located in 23 states, in Milton, Ontario; Windsor, Ontario; and in San Luis Potosí, Mexico. Generally, our facilities are utilized by our operating segments for various administrative, transportation-related or value-added services. We also deliver value-added services under our contract logistics segment inside or linked to 37 facilities provided by customers. Certain of our leased facilities are leased from entities controlled by our majority shareholders. These facilities are leased on either a month-to-month basis or extended terms. For more information on our lease arrangements, see Part II, Item 8: Notes 11, 13 and 16 to the Consolidated Financial Statements.

### ITEM 3: LEGAL PROCEEDINGS

The Company is involved in certain other claims and pending litigation arising from the ordinary conduct of business. We also provide accruals for claims within our self-insured retention amounts. Based on the knowledge of the facts, and in certain cases, opinions of outside counsel, in the Company's opinion the resolution of these claims and pending litigation will not have a material effect on our financial position, results of operations or cash flows. However, if we experience claims that are not covered by our insurance or that exceed our estimated claim reserve, it could increase the volatility of our earnings and have a materially adverse effect on our financial condition, results of operations or cash flows.

### ITEM 4: MINE SAFETY DISCLOSURES

Not applicable.

#### PART II

# ITEM 5: MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

#### **Market Information**

Our common stock is traded on The NASDAQ Global Market under the symbol ULH.

As of March 8, 2021, there were approximately 18 record holders of our common stock, based upon data available to us from our transfer agent. We believe, however, that we have a significantly greater number of shareholders because a substantial number of our common shares are held at The Depository Trust & Clearing Corporation on behalf of our shareholders.

#### **Dividends**

We have a cash dividend policy that anticipates a regular dividend of \$0.42 per share of common stock, payable in quarterly increments of \$0.105 per share of common stock. In addition, under our current dividend policy, after considering the regular quarterly dividends made during the year, the Board of Directors also evaluates the potential declaration of an annual special dividend payable in the first quarter of each year. The Board of Directors did not declare a special dividend in the first quarter of 2021.

Currently, we anticipate continuing to pay cash dividends on a quarterly basis, but we cannot guarantee that such dividends will be paid in the future. Future dividend policy and the payment of dividends, if any, will be determined by the Board of Directors in light of circumstances then existing, including our earnings, financial condition and other factors deemed relevant by the Board of Directors.

Limitations on our ability to pay dividends are described under the section captioned "Liquidity and Capital Resources – Revolving Credit, Promissory Notes and Term Loan Agreements" in Item 7 of this Form 10-K.

## **Securities Authorized for Issuance under Equity Compensation Plans**

See Part III, Item 12, "Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters" of this Annual Report for a presentation of compensation plans under which equity securities of the Company are authorized for issuance.

#### **Purchases of Equity Securities by the Issuer**

The following table provides information regarding the Company's purchases of its common stock during the period from October 4, 2020 to December 31, 2020, the Company's fourth fiscal quarter:

					Total Number of	Maximum Number of		
					Shares Purchased as	Shares that May Yet		
	Total Number of		Average Price	Paid	Part of Publicly	be Purchased Under		
Fiscal Period	Shares Purchased		per Share		per Share		Announced Program	the Plans or Program
Oct. 4, 2020 - Oct. 31, 2020			\$		-	378,378		
Nov. 1, 2020 - Nov. 28, 2020	-			-	-	378,378		
Nov. 29, 2020 - Dec. 31, 2020	6,250	(1)		22.05	-	378,378		
Total	6,250		\$	22.05		378,378		

<sup>(1)</sup> Consists of 6,250 shares of common stock acquired on December 8, 2020 by the Company from a director for \$137,800 upon exercising its right of first refusal pursuant to a restricted stock bonus award agreement.

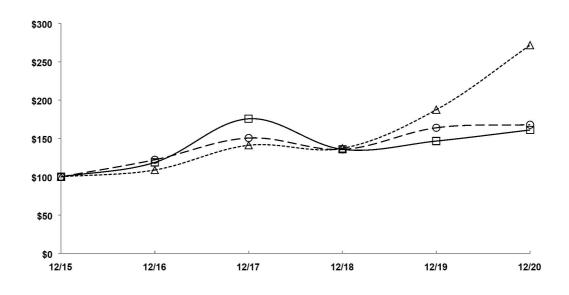

On June 30, 2014, the Company announced that it had been authorized to purchase up to 800,000 shares of its common stock from time to time in the open market. As of December 31, 2020, the Company may purchase 378,378 shares of its common stock under this authorization. No specific expiration date has been assigned to the authorization.

## **Performance Graph**

The graph below matches Universal Logistics Holdings, Inc.'s cumulative 5-year total shareholder return on common stock with the cumulative total returns of the NASDAQ Composite index and the NASDAQ Transportation index. The graph tracks the performance of a \$100 investment in our common stock and in each index (with the reinvestment of all dividends) from December 31, 2015 to December 31, 2020.

## **COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN\***

Among Universal Logistics Holdings, Inc., the NASDAQ Composite Index and the NASDAQ Transportation Index

— Universal Logistics Holdings, Inc. --☆-- NASDAQ Composite — → · NASDAQ Transportation

\*\$100 invested on 12/31/15 in stock or index, including reinvestment of dividends. Fiscal year ending December 31.

# ITEM 6: SELECTED FINANCIAL DATA

The following table sets forth the selected historical financial and operating data as of and for the periods presented. The selected historical balance sheet data at December 31, 2020, 2019, 2018, 2017 and 2016 and the selected historical statement of income data for the years ended December 31, 2020, 2019, 2018, 2017 and 2016 have been derived from our audited consolidated financial statements. The selected historical financial and operating data presented below should be read in conjunction with the information included under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements and related notes included elsewhere in this Form 10-K. The following financial and operating data may not be indicative of our future performance.

<sup>(1)</sup> Non-GAAP financial measure. See "Non-GAAP Financial Measures" below for a discussion of our non-GAAP financial measures and a reconciliation of such measures to the most comparable GAAP measure.

<sup>(2)</sup> Operating margin, adjusted operating margin, EBITDA margin, and adjusted EBITDA margin are computed by dividing income from operations, adjusted income from operations, EBITDA, and adjusted EBITDA, respectively, by total operating revenues for each of the periods indicated.

<sup>3)</sup> Net income divided by total average assets during the period. Average assets are the sum of our total assets at the end of the fiscal year and our total assets at the end of the prior fiscal year divided by two.

<sup>(4)</sup> Includes only those agents who generated at least \$100,000 in operating revenues during the period indicated.

### **Non-GAAP Financial Measures**

In addition to providing consolidated financial statements based on generally accepted accounting principles in the United States of America (GAAP), we are providing additional financial measures that are not required by or prepared in accordance with GAAP (non-GAAP). We present adjusted income from operations; earnings before interest, taxes, depreciation and amortization expenses (EBITDA); adjusted EBITDA; adjusted operating margin; EBITDA margin; and adjusted EBITDA margin as supplemental measures of our performance. We define adjusted income from operations as income from operations adjusted to eliminate the impact of certain items that we do not consider indicative of our ongoing operating performance, including charges related to certain litigation taken in 2019, 2018 and 2017. We define EBITDA as net income plus (i) interest expense, net, (ii) provision for income taxes and (iii) depreciation and amortization. Adjusted EBITDA is further adjusted to eliminate the impact of certain items that we do not consider indicative of our ongoing operating performance, including charges taken related to certain litigation in 2019, 2018 and 2017. Adjusted operating margin, EBITDA margin, and adjusted EBITDA margin are computed by dividing adjusted income from operations, EBITDA, and adjusted EBITDA, respectively, by total operating revenues. The comparable GAAP measure, operating margin, is computed by dividing income from operations by total operating revenues.

The calculations of adjusted income from operations, EBITDA, and adjusted EBITDA are itemized below. You are encouraged to evaluate these adjustments and the reasons we consider them appropriate for supplemental analysis. In evaluating adjusted income from operations, EBITDA and adjusted EBITDA, you should be aware that in the future we may incur expenses that are the same as or similar to some of the adjustments in this presentation. Our presentation of adjusted income from operations, EBITDA and adjusted EBITDA should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items.

In accordance with the requirements of Regulation G issued by the Securities and Exchange Commission, we are presenting the most directly comparable GAAP financial measure and reconciling the non-GAAP financial measure to the comparable GAAP measure. Set forth below is a reconciliation of income from operations, the most comparable GAAP measure, to adjusted income from operations; and of net income, the most comparable GAAP measure, to EBITDA and adjusted EBITDA for each of the periods indicated:

	Years ended December 31,									
		2020		2019		2018		2017		2016
		(In the	ousand	ls, except per sl	hare in	formation, ope	rating	data and percen	itages)

EBITDA		152,630		141,963		138,407		73,582		84,216
Litigation charges (1)				29,992		9,000		17,355		
Adjusted EBITDA	\$	152,630	\$	171,955	\$	147,407	\$	90,937	\$	84,216

(1) Represents charges recorded in 2019, 2018 and 2017 related to certain litigation.

We present adjusted income from operations, EBITDA and adjusted EBITDA, and the related metrics of adjusted operating margin, EBITDA margin and adjusted EBITDA margin, in this Form 10-K because we believe they assist investors and analysts in comparing our performance across reporting periods on a consistent basis by excluding items that we do not believe are indicative of our core operating performance.

These performance metrics have limited utility as analytical tools. Some of these limitations are:

- Adjusted income from operations and adjusted EBITDA do not reflect our cash expenditures, or future requirements, for capital expenditures or contractual commitments;
- · Adjusted income from operations and adjusted EBITDA do not reflect changes in, or cash requirements for, our working capital needs;
- Adjusted income from operations and adjusted EBITDA do not reflect the significant interest expense, or the cash requirements necessary to service interest or principal payments, on our debt;
- Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and adjusted EBITDA does not reflect any cash requirements for such replacements;

- Adjusted income from operations and adjusted EBITDA do not reflect the impact of certain cash charges resulting from matters we consider not to be indicative of our ongoing operations; and
- Other companies in our industry may calculate adjusted income from operations, EBITDA and adjusted EBITDA differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, adjusted income from operations, EBITDA and adjusted EBITDA, and the related metrics of adjusted operating margin, EBITDA margin and adjusted EBITDA margin, should not be considered in isolation or as a substitute for performance measures calculated in accordance with GAAP. We compensate for these limitations by relying primarily on our GAAP results and using these non-GAAP metrics as secondary, supplemental measures.

#### ITEM 7: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### Overview

We are a leading asset-light provider of customized transportation and logistics solutions throughout the United States, and in Mexico, Canada and Colombia. We provide a comprehensive suite of transportation and logistics solutions that allow our customers to reduce costs and manage their global supply chains more efficiently. We market our services through a direct sales and marketing network focused on selling our portfolio of services to large customers in specific industry sectors, through a contract network of agents who solicit freight business directly from shippers, and through company-managed facilities and full-service freight forwarding and customs house brokerage offices.

Our network of agents and owner-operators is located throughout the United States and in Ontario, Canada, and we operate, manage or provide services at 111 logistics locations in the United States, Mexico, Canada and Colombia. Thirty-seven of our value-added service operations are located inside customer plants or distribution operations; the other facilities are generally located close to our customers' plants to optimize the efficiency of their component supply chains and production processes. Our facilities and services are often directly integrated into the production processes of our customers and represent a critical piece of their supply chains. To support our asset-light business model, we generally coordinate the duration of real estate leases associated with our value-added services with the end date of the related customer contract associated with such facility, or use month-to-month leases, in order to mitigate exposure to unrecovered lease costs.

We offer our customers a wide range of transportation services by utilizing a diverse fleet of tractors and trailing equipment provided by us, our owner-operators and third-party transportation companies. Our owner-operators provided us with 2,718 tractors and 1,025 trailers. We own 1,751 tractors, 3,700 trailers, 2,420 chassis and 334 containers. Our agents and owner-operators are independent contractors who earn a fixed commission calculated as a percentage of the revenue or gross profit they generate for us and who bring an entrepreneurial spirit to our business. Our transportation services are provided through a network of both union and non-union employee drivers, owner-operators, contract drivers, and third-party transportation companies.

As of December 31, 2020, we employed 6,187 people in the United States, Mexico, Canada, and Colombia, including 2,288 employees subject to collective bargaining agreements. We also engaged contract staffing vendors to supply an average of 1,233 additional personnel on a full-time-equivalent basis

Our use of agents, owner-operators, third-party providers and contract staffing vendors allows us to maintain both a highly flexible cost structure and a scalable business operation, while reducing investment requirements. These benefits are passed on to our customers in the form of cost savings and increased operating efficiency, while enhancing our cash generation and the returns on our invested capital and assets.

We believe that our flexible business model also offers us substantial opportunities to grow through a mixture of organic growth and acquisitions. We intend to continue our organic growth by recruiting new agents and owner-operators, expanding into new industry verticals and targeting further penetration of our key customers. We believe our integrated suite of transportation and logistics services, our network of facilities in the United States, Mexico, Canada, and Colombia, our long-term customer relationships and our reputation for operational excellence will allow us to capitalize on these growth opportunities. We also expect to continue to make strategic acquisitions of companies that complement our asset light business model, as well as companies that derive a portion of their revenues from asset based operations.

We report our financial results in four distinct reportable segments, contract logistics, intermodal, trucking, and company-managed brokerage. Operations aggregated in our contract logistics segment deliver value-added and/or dedicated transportation services to support in-bound logistics to original equipment manufacturers (OEMs) and major retailers on a contractual basis, generally pursuant to terms of one year or longer. Our intermodal segment is associated with local and regional drayage moves coordinated by company-managed terminals using a mix of owner-operators, company equipment and third-party capacity providers (broker carriers). Operations aggregated in our trucking segment are associated with individual freight shipments coordinated by our agents and company-managed terminals using a mix of owner-operators, company equipment and broker carriers. Our company-managed brokerage segment provides for the pick-up and delivery of individual freight shipments using broker carriers, coordinated by our company-managed operations.

## COVID-19 Pandemic

The Company remains committed to doing its part to protect its employees, customers, vendors and the general public from the spread of the coronavirus outbreak (COVID-19). We have distributed cleaning and protective supplies to our workforce, increased cleaning frequency and coverage, and provided employees direction on precautionary measures, such as sanitizing truck interiors, personal hygiene, and social distancing. We will continue to adapt our operations as required to ensure safety while continuing to provide a high level of service to our customers.

The spread of COVID-19 resulted in governmental authorities enforcing measures to try to contain the virus, which severely disrupted economic and commercial activity during the latter part of the first and most of the second quarter of 2020. To mitigate the impact on our business, we implemented numerous cost reduction efforts including furloughing a large portion of our direct labor force, requiring personnel to take unpaid time-off, restricting travel, reducing discretionary spending, and various other measures. During the third quarter 2020, we experienced a rebound in demand for transportation and manufacturing support services and experienced a more normalized level of business activity. Although we estimate COVID-19 had the largest impact on our business during the second quarter 2020, we are unable to predict with any certainty the future impact COVID-19 may have on our operational and financial performance. The ultimate magnitude of COVID-19, including the extent of its impact on the Company's financial and operating results, which could be material, will be determined by the length of time the pandemic continues, its severity, government regulations imposed in response to the pandemic, and to its general effect on the economy and transportation demand.

While operating cash flows may be negatively impacted by the pandemic, the Company believes we will be able to finance our near term needs for working capital over the next twelve months, as well as any planned capital expenditures during such period, with cash balances, cash flows from operations, and loans and extensions of credit under our credit facilities and on margin against our marketable securities. Should the impact of the COVID-19 pandemic last longer than anticipated, and/or our cash flow from operations decline more than expected, we may need to obtain additional financing. The Company's ability to fund future operating expenses and capital expenditures, as well as its ability to meet future debt service obligations or refinance indebtedness will depend on future operating performance, which will be affected by general economic, financial, and other factors beyond our control.

### **Factors Affecting Our Revenues**

Operating Revenues. We generate substantially all of our revenues through fees charged to customers for the transportation of freight and for the customized logistics services we provide. We also derive revenue from fuel surcharges, where separately identifiable, loading and unloading activities, equipment detention, container management and storage and other related services. Operations in our intermodal, trucking and company-managed brokerage segments are associated with individual freight shipments coordinated by our agents and company-managed terminals. In contrast, our contract logistics segment delivers value-added services and/or transportation services to specific customers on a dedicated basis, generally pursuant to contract terms of one year or longer. Our segments are further distinguished by the amount of forward visibility we have into pricing and volumes, and also by the extent to which we dedicate resources and company-owned equipment. Fees charged to customers by our full service international freight forwarding and customs house brokerage are based on the specific means of forwarding or delivering freight on a shipment-by-shipment basis.

Our truckload, intermodal and brokerage revenues are primarily influenced by fluctuations in freight volumes and shipping rates. The main factors that affect these are competition, available truck capacity, and economic market conditions. Our value-added and dedicated transportation business is substantially driven by the level of demand for outsourced logistics services. Major factors that affect our revenues include changes in manufacturing supply chain requirements, production levels in specific industries, pricing trends due to levels of competition and resource costs in logistics and transportation, and economic market conditions.

We recognize revenue as control of the promised goods or services is transferred to our customers, in an amount that reflects the consideration the Company expects to receive in exchange for its services. For our transportation services businesses, which include truckload, brokerage, intermodal and dedicated services, revenue is recognized over-time as the performance obligations on the in-transit services are completed. For the Company's value-added service businesses, we have elected to use the "right to invoice" practical expedient, reflecting that a customer obtains the benefit associated with value-added services as they are provided. For additional information on revenue recognition, see Item 8, Note 3 to the Consolidated Financial Statements.

## **Factors Affecting Our Expenses**

Purchased transportation and equipment rent. Purchased transportation and equipment rent represents the amounts we pay to our owner-operators or other third party equipment providers to haul freight and, to the extent required to deliver certain logistics services, the cost of equipment leased under short-term contracts from third parties. The amount of the purchased transportation we pay to our owner-operators is primarily based on a contractually agreed-upon percentage of our revenue for each load hauled, net of any rental income we receive by leasing our trailers to owner-operators. The expense also includes the amount of fuel surcharges, where separately identifiable, that we receive from our customers and pass through to our owner-operators. Our strategy is to maintain a highly flexible business model that employs a cost structure that is mostly variable in nature. As a result, purchased transportation and equipment rent is the largest component of our costs and increases or decreases proportionately with changes in the amount of revenue generated by our owner-operators and other third party providers and with the production volumes of our customers. We recognize purchased transportation and equipment rent as the services are provided.

Direct personnel and related benefits. Direct personnel and related benefits include the salaries, wages and fringe benefits of our employees, as well as costs related to contract labor utilized in selling and operating activities. These costs are a significant component of our cost structure and increase or decrease proportionately with the expansion, addition or closing of operating facilities. As of December 31, 2020, approximately 33% of our employees in the United States, Canada and Colombia, and 87% of our employees in Mexico were subject to collective bargaining agreements. Any changes in union agreements will affect our personnel and related benefits cost. The operations in the United States, Mexico and Canada that are subject to collective bargaining agreements have separate, individualized agreements with several different unions that represent employees in these operations. While there are some facilities with multiple unions, each collective bargaining agreement with each union covers a single facility for that union. Such agreements have expiration dates that are generally independent of other collective bargaining agreements and include economics and operating terms tailored to the specific operational requirements of a customer. Our operation in Mexico provides competitive compensation within the Mexican statutory framework for managerial and supervisory personnel.

Operating supplies and expenses. These expenses include items such as fuel, tires and parts repair items primarily related to the maintenance of company owned/leased tractors, trailers and lift equipment, as well as licenses, dock supplies, communication, utilities, operating taxes and other general operating expenses. Because we maintain a flexible business model, our operating expenses generally relate to equipment utilization, fluctuations in customer demand and the related impact on our operating capacity. Our transportation services provided by company owned equipment depend on the availability and pricing of diesel fuel. Although we often include fuel surcharges in our billing to customers to offset increases in fuel costs, other operating costs have been, and may continue to be, impacted by fluctuating fuel prices. We recognize these expenses as they are incurred and the related income as it is earned.

Commission expense. Commission expense represents the amount we pay our agents for generating shipments on our behalf. The commissions we pay to our agents are generally established through informal oral agreements and are based on a percentage of revenue or gross profit generated by each load hauled. Traditionally, commission expense increases or decreases in proportion to the revenues generated through our agents. We recognize commission expense at the time we recognize the associated revenue.

Occupancy expense. Occupancy expense includes all costs related to the lease and tenancy of terminals and operating facilities, except utilities, unless such costs are otherwise covered by our customers. Although occupancy expense is generally related to fluctuations in overall customer demand, our contracting and pricing strategies help mitigate the cost impact of changing production volumes. To minimize potential exposure to inactive or underutilized facilities that are dedicated to a single customer, we strive where possible to enter into lease agreements that are coterminous with individual customer contracts, and we seek contract pricing terms that recover fixed occupancy costs, regardless of production volume. Occupancy expense may also include certain lease termination and related occupancy costs that are accelerated for accounting purposes into the fiscal year in which such a decision was implemented.

General and administrative expense. General and administrative expense includes the salaries, wages and benefits of administrative personnel, related support costs, taxes (other than income and property taxes), adjustments due to foreign currency transactions, bad debt expense, and other general expenses, including gains or losses on the sale or disposal of assets. These expenses are generally not directly related to levels of operating activity and may contain other expenses related to general business operations. We recognize general and administrative expense when it is incurred.

Insurance and claims. Insurance and claims expense represents our insurance premiums and the accruals we make for claims within our self-insured retention amounts. Our insurance premiums are generally calculated based on a mixture of a percentage of line-haul revenue and the size of our fleet. Our accruals have primarily related to cargo and property damage claims. We may also make accruals for personal injuries and property damage to third parties, physical damage to our equipment, general liability and workers' compensation claims if we experience a claim in excess of our insurance coverage. To reduce our exposure to non-trucking use liability claims (claims incurred while the vehicle is being operated without a trailer attached or is being operated with an attached trailer which does not contain or carry any cargo), we require our owner-operators to maintain non-trucking use liability coverage, which the industry refers to as deadhead bobtail coverage, of \$2.0 million per occurrence. Our exposure to liability associated with accidents incurred by other third party providers who haul freight on our behalf is reduced by various factors including the extent to which they maintain their own insurance coverage. Our insurance expense varies primarily based upon the frequency and severity of our accident experience, insurance rates, our coverage limits and our self-insured retention amounts.

Depreciation and amortization. Depreciation and amortization expense relates primarily to the depreciation of owned tractors, trailers, computer and operating equipment, and buildings as well as the amortization of the intangible assets recorded for our acquired customer contracts and customer and agent relationships. We estimate the salvage value and useful lives of depreciable assets based on current market conditions and experience with past dispositions.

## **Operating Revenues**

We broadly group our services into the following categories: truckload services, brokerage services, intermodal services, dedicated services and value-added services. Our truckload, brokerage and intermodal services associated with individual freight shipments coordinated by our agents and company-managed terminals, while our dedicated and value-added services to specific customers on a contractual basis, generally pursuant to contract terms of one year or longer. The following table sets forth operating revenues resulting from each of these service categories for the years ended December 31, 2020, 2019 and 2018, presented as a percentage of total operating revenues:

	Years ended December 31,					
	2020	2019	2018			
Operating revenues:			_			
Truckload services	14.5%	16.6%	21.5%			
Brokerage services	24.2%	23.5%	25.1%			
Intermodal services	28.3%	25.8%	17.2%			
Dedicated services	9.2%	9.2%	9.9%			
Value-added services	23.8%	24.9%	26.3%			
Total operating revenues	100.0%	100.0%	100.0%			

## **Results of Operations**

The following table sets forth items derived from our Consolidated Statements of Income for the years ended December 31, 2020, 2019 and 2018, presented as a percentage of operating revenues:

	Years e	Years ended December 31,				
	2020	2019	2018			
Operating revenues	100.0%	100.0%	100.0%			
Operating expenses:						
Purchased transportation and equipment rent	48.5	47.8	49.0			
Direct personnel and related benefits	24.3	24.4	24.3			
Operating supplies and expenses	8.0	8.0	8.4			
Commission expense	1.9	2.1	2.6			
Occupancy expense	2.5	2.4	2.1			
General and administrative	2.4	2.9	2.2			
Insurance and claims	1.4	3.1	2.1			
Depreciation and amortization	5.3	4.9	3.7			
Total operating expenses	94.2	95.7	94.3			
Income from operations	5.8	4.3	5.7			
Interest and other non-operating income (expense), net	(1.2)	(0.9)	(1.0)			
Income before for income taxes	4.6	3.3	4.7			
Income tax (benefit) expense	1.1	0.7	1.2			
Net income	3.5%	2.5%	3.6%			

## 2020 Compared to 2019

Operating revenues. Operating revenues for 2020 decreased \$120.9 million, or 8.0%, to \$1,391.1 million from \$1,512.0 million in 2019. Included in operating revenues are separately-identified fuel surcharges of \$67.9 million in 2020 compared to \$89.6 million in 2019. Excluding intermodal, the Company experienced decreases in each of its service lines in 2020 compared to the prior year. Consolidated income from operations increased \$15.0 million, or 22.9%, to \$80.4 million for 2020 compared to \$65.4 million during the same period last year. Included in 2019 income from operations were \$30.0 million in litigation related charges related to previously disclosed legal matters.

In the contract logistics segment, which includes value-added and dedicated services, operating revenues decreased \$55.5 million to \$459.7 million in 2020 compared to \$515.2 million in the previous year. Income from operations in the contract logistics segment decreased \$12.4 million, or 25.7%, to \$36.0 million for 2020 compared to \$48.4 million in 2019. The decrease in operating revenues and income is primarily attributable to the shutdown of North American automotive and heavy-truck manufacturing in the first half of 2020 due to the COVID-19 pandemic.

In the intermodal segment, operating revenues increased \$3.3 million to \$393.6 million in 2020 compared to \$390.3 million in the previous year. Intermodal revenues for 2020 included \$40.1 million in separately identified fuel surcharges, compared to \$47.1 million in the same period last year. Income from operations in the intermodal segment decreased \$8.8 million to \$30.4 million for 2020 compared to \$39.2 million in 2019. As a percentage of revenue, operating margin decreased to 7.7% in 2020 compared to 10.0% in 2019. During 2020, Universal's intermodal segment increased the number of loads hauled by 7.3%, however its average operating revenue per load, excluding fuel surcharges, more than offset this increase falling 11.0% compared to the same period last year.

In the trucking segment, which includes agent-based and company-managed trucking operations, operating revenues decreased \$71.2 million to \$318.4 million in 2020 compared to \$389.6 million in the previous year. Income from operations in the trucking segment increased \$37.9 million to \$16.4 million for 2020 compared to an operating loss of \$21.5 million in 2019, which included the settlement of a previously disclosed legal matter. In 2020, the trucking segment experienced a 5.6% increase in its average operating revenue per load, excluding fuel surcharges, however, the number of loads hauled fell 19.8% compared to the same period last year.

Operating revenues in the company-managed brokerage segment, increased \$2.4 million to \$218.1 million in 2020 compared to \$215.8 million in the previous year. As a percentage of revenue, operating margin decreased to a negative 1.2% in 2020 compared to 0.8% in 2019. Although 2020 underperformed 2019, the fourth quarter of 2020 was an improvement sequentially as the Company continues to rationalize both lanes and customers. The company-managed brokerage segment's average operating revenue per load increased 1.6% in 2020 while the loads moved decreased 0.7% compared to the same period last year.

Purchased transportation and equipment rent. Purchased transportation and equipment rental costs for 2020 decreased by \$48.9 million, or 6.8%, to \$674.1 million from \$723.1 million during the same period last year. Purchased transportation and equipment rent generally increases or decreases in proportion to the revenues generated through owner-operators and other third party capacity providers and is generally correlated with changes in demand for transportation-related services, which includes truckload, brokerage, intermodal and dedicated services. The absolute decrease in purchased transportation and equipment rental costs was primarily the result of a decrease in transportation-related service revenues. In 2020, transportation-related service revenues decreased 6.7% compared to 2019. As a percentage of operating revenues, purchased transportation and equipment rent expense increased to 48.5% compared to 47.8% during the same period last year. The increase was due to an increase in the mix of transportation-related service revenue. As a percentage of total revenues, transportation-related service revenue increased to 76.1% for 2020 compared to 75.1% in the same period last year.

Direct personnel and related benefits. Direct personnel and related benefits for 2020 decreased by \$30.6 million, or 8.3%, to \$337.6 million compared to \$368.2 million during the same period last year. Trends in these expenses are generally correlated with changes in operating facilities and headcount requirements and, therefore, increase and decrease with the level of demand for our value-added services and staffing needs of our operations. The decrease was due to layoffs and temporary furloughs to right-size staffing as a cost cutting measure in response to the economic slowdown as a result of the COVID-19 pandemic. As a percentage of operating revenues, personnel and related benefits slightly decreased to 24.3% for 2020, compared to 24.4% for 2019. The percentage is derived on an aggregate basis from both existing and new programs, and from customer operations at various stages in their lifecycles. Individual operations may be impacted by additional production shifts or by overtime at selected operations. While generalizations about the impact of personnel and related benefits costs as a percentage of total revenue are difficult, we manage compensation and staffing levels, including the use of contract labor, to maintain target economics based on near-term projections of demand for our services.

Operating supplies and expenses. Operating supplies and expenses decreased by \$9.7 million, or 8.0%, to \$111.1 million for 2020 compared to \$120.8 million for 2019. These expenses include items such as fuel, maintenance, cost of materials, communications, utilities and other operating expenses, and generally relate to fluctuations in customer demand. The main elements of the decrease included decreases of \$7.3 million in fuel expense on company tractors, \$2.9 million in operating supplies and material costs in operations supporting heavy-truck programs, \$2.4 million in vehicle and other maintenance, and \$1.9 million in travel and entertainment. These decreases were partially offset by increases of \$3.3 million in professional fees and \$2.0 million in bad debt expense.

*Commission expense*. Commission expense for 2020 decreased by \$4.5 million, or 14.6%, to \$26.7 million from \$31.2 million for 2019. Commission expense decreased due to decreased revenue in the agency based truckload business. As a percentage of operating revenues, commission expense decreased to 1.9% for 2020, compared to 2.1% one year earlier.

*Occupancy expense*. Occupancy expenses decreased by \$2.1 million, or 5.6%, to \$34.6 million for 2020. This compares to \$36.6 million for 2019. The decrease was primarily attributable to a decrease in building rents and property taxes as we consolidated facilities for certain value-added programs.

*General and administrative.* General and administrative expense for 2020 decreased by \$11.2 million to \$33.3 million from \$44.5 million in 2019. The decrease was attributable to a \$6.6 million decrease in salaries, wages, and benefits and a \$6.0 million decrease in professional fees. Included in professional fees for 2019 was a \$5.1 million charge for a previously disclosed legal matter. As a percentage of operating revenues, general and administrative expense was 2.4% for 2020 compared to 2.9% for 2019.

*Insurance and claims*. Insurance and claims expense for 2020 decreased by \$28.2 million to \$19.3 million from \$47.4 million in 2019. As a percentage of operating revenues, insurance and claims decreased to 1.4% for 2020 compared to 3.1% for 2019. The decrease was primarily attributable to a \$24.8 million charge for a legal settlement in the third quarter of 2019 as well as a decrease in our auto liability premiums and contractor insurance. This was partially offset by an increase in cargo and service failure claims, including \$0.5 million in service claims related to the June 2020 cyber-attack.

*Depreciation and amortization*. Depreciation and amortization expense for 2020 decreased by \$0.6 million, or 0.8%, to \$74.1 million from \$74.8 million for 2019. Depreciation expense decreased \$0.1 million in 2020 and amortization expense decreased \$0.5 million.

*Interest expense*, *net*. Net interest expense was \$14.6 million for 2020 compared to \$17.0 million for 2019. The decrease in net interest expense reflects a decrease in the average interest rate on our outstanding borrowings. As of December 31, 2020, our outstanding borrowings totaled \$461.7 million compared to \$459.7 million at the same time last year.

Other non-operating (expense) income. Other non-operating expense was \$1.9 million for 2020 compared to other non-operating income of \$1.8 million in 2019. Included in other non-operating expense during 2020 was \$1.6 million in losses on marketable securities compared to \$1.5 million in gains in 2019.

*Income tax expense.* Income tax expense for 2020 was \$15.8 million, compared to \$12.6 million for 2019, based on an effective tax rate of 24.7% and 25.1% respectively. The increase in income taxes in 2020 is the result of an increase in taxable income for 2020 compared to 2019.

#### 2019 Compared to 2018

Operating revenues. Operating revenues for 2019 increased \$50.3 million, or 3.4%, to \$1,512.0 million from \$1,461.7 million in 2018. Excluding intermodal, the Company experienced decreases in each of its service lines in 2019 compared to the prior year. Included in operating revenues are separately-identified fuel surcharges of \$89.6 million in 2019 compared to \$85.1 million in 2018. Consolidated income from operations decreased \$18.4 million, or 22.0%, to \$65.4 million for 2019 compared to \$83.8 million during the same period last year. Included in 2019 income from operations were \$30.0 million in litigation related charges related to previously disclosed legal matters, compared to \$9.0 million of similar charges in the same period last year.

In the contract logistics segment, which includes value-added and dedicated services, operating revenues decreased \$14.1 million to \$515.2 million in 2019 compared to \$529.2 million in the previous year. Income from operations in the contract logistics segment increased \$16.4 million, or 51.1%, to \$48.4 million for 2019 compared to \$32.0 million in 2018, which included \$9.0 million in litigation charges related to a previously disclosed matter. The increase in operating income was primarily attributable to improved operating performance in our dedicated transportation businesses as well as our operations supporting Class 8 heavy-truck production. Our 2019 results were negatively impacted by a then existing United Auto Workers ("UAW") strikes in the third and fourth quarters.

In the intermodal segment, operating revenues increased \$139.2 million to \$390.3 million in 2019 compared to \$251.1 million in the previous year. Intermodal revenues included \$150.4 million of incremental acquisition related revenue in 2019. Intermodal revenues for 2019 also included \$47.1 million in separately identified fuel surcharges, compared to \$30.3 million in the same period last year. Income from operations in the intermodal segment increased \$12.1 million to \$39.2 million for 2019 compared to \$27.1 million in 2018. As a percentage of revenue, operating margin decreased to 10.0% in 2019 compared to 10.8% in 2018. During 2019, Universal's intermodal segment increased the number of loads hauled by 47.3%, and also increased its average operating revenue per load, excluding fuel surcharges, by 5.2%.

In the trucking segment, which includes agent-based and company-managed trucking operations, operating revenues decreased \$64.7 million to \$389.6 million in 2019 compared to \$454.3 million in the previous year. Included in trucking revenues during 2019 were \$26.3 million in separately-identified fuel surcharges compared to \$34.3 million during the same period last year. Income from operations in the trucking segment decreased \$37.5 million to an operating loss of \$21.5 million for 2019. This compares to operating income of \$16.0 million in 2018. The decrease in operating income was primarily attributable to \$24.8 million in litigation charges related to a previously disclosed legal matter. During 2019, the trucking segment also experienced a 1.0% decrease in its average operating revenue per load, excluding fuel surcharges, and a 18.7% decrease in the number of loads hauled.

In the company-managed brokerage segment, operating revenues decreased \$9.8 million to \$215.8 million in 2019 compared to \$225.6 million in the previous year. Operating income decreased \$5.8 million to \$1.8 million in 2019 compared to \$7.7 million in the prior year. The decrease reflects a 12.9% decrease in average operating revenue per load, which was partially offset by a 12.7% increase in the number of company-managed brokerage loads moved.

Purchased transportation and equipment rent. Purchased transportation and equipment rental costs for 2019 increased by \$7.1 million, or 1.0%, to \$723.1 million from \$716.0 million during the same period last year. Purchased transportation and equipment rent generally increases or decreases in proportion to the revenues generated through owner-operators and other third party capacity providers and is generally correlated with changes in demand for transportation-related services, which includes truckload, brokerage, intermodal and dedicated services. The absolute increase in purchased transportation and equipment rental costs was primarily the result of an increase in transportation-related service revenues. In 2019, transportation-related service revenues increased 5.4% compared to 2018. As a percentage of operating revenues, purchased transportation and equipment rent expense decreased to 47.8% compared to 49.0% during the same period last year. The decrease was primarily attributable to an increase in the mix of intermodal revenues, where the cost of transportation is typically lower than our other transportation businesses, and an increase in the use of company drivers in our dedicated transportation operations. As a percentage of revenues, intermodal services increased to 25.8% in 2019 compared to 17.2% in 2018.

Direct personnel and related benefits. Direct personnel and related benefits for 2019 increased by \$13.6 million, or 3.8%, to \$368.2 million compared to \$354.7 million during the same period last year. Trends in these expenses are generally correlated with changes in operating facilities and headcount requirements and, therefore, increase and decrease with the level of demand for our value-added services and staffing needs of our operations. However, in 2019, we experienced extended plant shut-downs in operations supporting passenger vehicles, and thus value-added revenues associated with those operations were lower compared to the prior year. Increases in direct personnel and related benefits were primarily driven by increases in labor costs in our dedicated transportation business as well as company-managed brokerage operations. A portion of the increase was also attributable to incremental personnel and related benefits from acquired companies, which totaled \$19.3 million. As a percentage of operating revenues, personnel and related benefits slightly increased to 24.4% for 2019, compared to 24.3% for 2018. The percentage is derived on an aggregate basis from both existing and new programs, and from customer operations at various stages in their lifecycles. Individual operations may be impacted by additional production shifts or by overtime at selected operations. While generalizations about the impact of personnel and related benefits costs as a percentage of total revenue are difficult, we manage compensation and staffing levels, including the use of contract labor, to maintain target economics based on near-term projections of demand for our services.

Operating supplies and expenses. Operating supplies and expenses decreased by \$2.0 million, or 1.6%, to \$120.8 million for 2019 compared to \$122.7 million for 2018. These expenses include items such as fuel, maintenance, cost of materials, communications, utilities and other operating expenses, and generally relate to fluctuations in customer demand. The main elements of the decrease included decreases of \$4.6 million in operating supplies and material costs in operations supporting heavy-truck programs, \$1.5 million in fuel expense on company tractors, \$0.9 million in professional fees, \$0.3 million in utilities, \$0.3 million in plate expenses, and \$0.1 million in office supplies. These decreases were partially offset by increases of \$2.2 million in bad debt expense, \$1.7 million in vehicle and other maintenance, \$0.7 million in permit expenses, \$0.6 million in travel and entertainment, and \$0.6 million in communications expenses.

*Commission expense*. Commission expense for 2019 decreased by \$6.2 million, or 16.5%, to \$31.2 million from \$37.4 million for 2018. Commission expense decreased due to decreased revenue in the agency based truckload business. As a percentage of operating revenues, commission expense decreased to 2.1% for 2019, compared to 2.6% one year earlier.

*Occupancy expense*. Occupancy expenses increased by \$5.9 million, or 19.4%, to \$36.6 million for 2019. This compares to \$30.7 million for 2018. The increase was primarily attributable to an increase in building rents due to new locations added from the acquisitions made in 2018 and 2019. The increase was also due to a redundant facility in preparation of a relocation of one of our operations supporting heavy-truck production.

*General and administrative.* General and administrative expense for 2019 increased by \$13.0 million to \$44.5 million from \$31.5 million in 2018. The increase was attributable to a \$7.0 million increase in professional fees and a \$5.9 million increase in salaries, wages, and benefits. Included in the increase in professional fees was a \$5.1 million charge for a previously disclosed legal matter. As a percentage of operating revenues, general and administrative expense was 2.9% for 2019 compared to 2.2% for 2018.

Insurance and claims. Insurance and claims expense for 2019 increased by \$16.9 million to \$47.4 million from \$30.5 million in 2018. As a percentage of operating revenues, insurance and claims increased to 3.1% for 2019 compared to 2.1% for 2018. Included in 2019 were \$24.8 million in pre-tax charges for the settlement of a legal matter. Included in 2018 was a \$9.0 million in pre-tax charges for the settlement of a legal matter. Excluding these items, insurance and claims expense was \$22.6 million in 2019 and \$21.5 million in 2018. The increase in insurance and claims expense, excluding the previously mentioned legal items, is primarily due to a \$4.0 million increase in premiums and a \$2.9 million decrease in cargo claims.

Depreciation and amortization. Depreciation and amortization expense for 2019 increased by \$20.3 million, or 37.4%, to \$74.8 million from \$54.4 million for 2018. Depreciation expense increased \$10.0 million. The increase in depreciation is attributable to continued recapitalization of our fleet, while the increase in amortization expense is attributable to amortization of intangible assets acquired in connection with Universal's 2018 and 2019 acquisitions.

*Interest expense*, *net*. Net interest expense was \$17.0 million for 2019 compared to \$14.6 million for 2018. The increase of net interest expense reflects an increase in outstanding borrowing. As of December 31, 2019, our outstanding borrowings totaled \$459.7 million compared to \$403.2 million at the same time last year.

Other non-operating income. Other non-operating income was \$1.8 million for 2019 compared to \$0.2 million for 2018. Included in other non-operating income during 2019 were \$1.5 million of gains on marketable securities compared to \$1.3 million of losses on marketable securities in 2018. Additionally, included in 2018 were gains of \$1.0 million from life insurance policies.

*Income tax expense.* Income tax expense for 2019 was \$12.6 million, compared to \$17.2 million for 2018, based on an effective tax rate of 25.1% and 24.8% respectively. The decrease in income taxes in 2019 is the result of decrease in taxable income for 2019 compared to 2018.

## **Liquidity and Capital Resources**

Our primary sources of liquidity are funds generated by operations, loans and extensions of credit under our credit facilities, on margin against our marketable securities and from installment notes, and proceeds from the sales of marketable securities. We use secured, asset lending to fund a substantial portion of purchases of tractors, trailers and material handling equipment.

We employ an asset-light operating strategy which we believe lowers our capital expenditure requirements. In general, our facilities used in our value-added services are leased on terms that are either substantially matched to our customer's contracts, are month-to-month or are provided to us by our customers. We also utilize owner-operators and third-party carriers to provide a significant portion of our transportation and specialized services. A significant portion of the tractors and trailers used in our business are provided by our owner-operators. In addition, our use of agents reduces our overall need for large terminals. As a result, our capital expenditure requirements are limited in comparison to most large transportation and logistics service providers, which maintain significant properties and sizable fleets of owned tractors and trailers.

In 2020, our capital expenditures totaled \$90.7 million. These expenditures primarily consisted of transportation equipment, property and investments in support of our value-added service operations. Our asset-light business model depends somewhat on the customized solutions we implement for specific customers. As a result, our capital expenditures will depend on specific new contracts and the overall age and condition of our owned transportation equipment. In 2021, exclusive of acquisitions of businesses, we expect our capital expenditures to be in the range of 4% to 5% of operating revenues. We expect to make these capital expenditures for the acquisition of transportation equipment, to support our new and existing value-added service operations, and for the acquisition of real property and improvements to our existing terminal yard and container facilities.

We have a cash dividend policy that anticipates a regular dividend of \$0.42 per share of common stock, payable in quarterly increments of \$0.105 per share of common stock. After considering the regular quarterly dividends made during the year, the Board of Directors also evaluates the potential declaration of an annual special dividend payable in the first quarter of each year. The Board of Directors did not declare a special dividend in the first quarter of 2021. Due to the uncertainty caused by the Covid-19 pandemic, our Board of Directors temporarily suspended the Company's cash dividend policy during the first half of 2020. The policy has since been reinstated, and on February 4, 2021, our Board of Directors declared the regular quarterly cash dividend of \$0.105 per share of common stock payable April 5, 2021 to shareholders of record at the close of business on March 1, 2021. During the year ended December 31, 2020, we paid a total of \$0.21 per common share, or \$5.7 million. Future dividend policy and the payment of dividends, if any, will be determined by the Board of Directors in light of circumstances then existing, including our earnings, financial condition and other factors deemed relevant by the Board of Directors.

While operating cash flows may be negatively impacted by a prolonged pandemic, the Company believes we will be able to finance our near term needs for working capital over the next twelve months, as well as any planned capital expenditures during such period, with cash balances, cash flows from operations, and loans and extensions of credit under our credit facilities and on margin against our marketable securities. Should the impact of the COVID-19 pandemic last longer than anticipated, and/or our cash flow from operations decline more than expected, we may need to obtain additional financing. The Company's ability to fund future operating expenses and capital expenditures, as well as its ability to meet future debt service obligations or refinance indebtedness will depend on future operating performance, which will be affected by general economic, financial, and other factors beyond our control.

We continue to evaluate business development opportunities, including potential acquisitions that fit our strategic plans. There can be no assurance that we will identify any opportunities that fit our strategic plans or will be able to execute any such opportunities on terms acceptable to us. Depending on prospective consideration to be paid for an acquisition, any such opportunities would be financed first from available cash and cash equivalents and availability of borrowings under our credit facilities.

### Revolving Credit, Promissory Notes and Term Loan Agreements

Our secured credit facility (the "Credit Facility") provides for maximum borrowings of \$350 million in the form of a \$150 million term loan and a \$200 million revolver at a variable rate of interest based on LIBOR or a base rate and matures on November 26, 2023. The Credit Facility, which is secured by cash, deposits, accounts receivable, and selected other assets of the applicable borrowers, includes customary affirmative and negative covenants and events of default, as well as financial covenants requiring minimum fixed charge coverage and leverage ratios, and customary mandatory prepayments provisions. Our Credit Facility includes an accordion feature which allows us to increase availability by up to \$100 million upon our request. At December 31, 2020, we were in compliance with all covenants under the Credit Facility, and \$48.7 million was available for borrowing.

A wholly-owned subsidiary issued a series of promissory notes in order to finance transportation equipment (the "Equipment Financing"). The notes issued in connection with the Equipment Financing, which are secured by liens on selected titled vehicles, include certain affirmative and negative covenants, are generally payable in 60 monthly installments and bear interest at fixed rates ranging from 2.78% to 5.13%.

A wholly-owned subsidiary issued a series of promissory notes in order to finance certain purchases of real property (the "Real Estate Financing"). The promissory notes, which are secured by first mortgages and assignment of leases on specific parcels of real estate and improvements, include certain affirmative and negative covenants and are generally payable in 120 monthly installments. Each of the notes bears interest variable rate ranging from LIBOR plus 1.85% to LIBOR plus 2.25%. At December 31, 2020, we were in compliance with all covenants.

We also maintain a short-term line of credit secured by our portfolio of marketable securities (the "Margin Facility"). It bears interest at LIBOR plus 1.10%. The amount available under the Margin Facility is based on a percentage of the market value of the underlying securities. We did not have any amounts advanced against the line as of December 31, 2020, and the maximum available borrowings were \$4.2 million.

### Discussion of Cash Flows

At December 31, 2020, we had cash and cash equivalents of \$8.8 million compared to \$7.7 million at December 31, 2019. Operating activities provided \$99.3 million in net cash, and we used \$86.6 million in investing activities and \$9.0 million in financing activities.

The \$99.3 million in net cash provided by operations was primarily attributed to \$48.1 million of net income, which reflects non-cash depreciation and amortization, noncash lease expense, losses on marketable equity securities, gains on equipment sales, amortization of debt issuance costs, stock-based compensation, provisions for doubtful accounts and a change in deferred income taxes totaling \$105.5 million, net. Net cash provided by operating activities also reflects an aggregate increase in net working capital totaling \$54.3 million. The primary drivers behind the increase in working capital were increases in trade and other accounts receivable and in prepaid expenses and other assets and principal reductions in operating lease liabilities during the period. These were partially offset by increases in trade accounts payable, accruals for insurance and claims, accrued income taxes, accrued expenses and other current liabilities, other long-term liabilities, and a decrease in prepaid income taxes. Increases in working capital included \$10.2 million of payroll taxes deferred under the CARES Act, which we intend to pay in 2021. Affiliate transactions increased net cash provided by operating activities by \$2.7 million. The increase in net cash resulted from a decrease in accounts receivable from affiliates of \$0.5 million and an increase in accounts payable to affiliates of \$2.2 million.

The \$86.6 million in net cash used in investing activities consisted of \$90.7 million in capital expenditures, \$1.3 million for a working capital adjustment from a 2019 acquisition, and \$0.4 million for purchases of marketable securities. These uses were partially offset by \$4.2 million in proceeds from the sale of equipment and \$1.6 million in proceeds from the sale of marketable securities.

We also used \$9.0 million in financing activities during 2020. We paid cash dividends of \$5.7 million and repurchased \$5.1 million of treasury stock. At December 31, 2020, we had outstanding borrowings totaling \$461.7 million compared to \$459.7 million at December 31, 2019. We had net borrowings on our revolving lines of credit and margin facility totaling \$0.1 million and borrowed an additional \$63.9 million for new equipment and real estate. We also made term loan, and equipment and real estate note payments totaling \$62.0 million during the period.

## **Contractual Obligations**

The following summarizes our contractual obligations at December 31, 2020, and the effect such obligations are expected to have on our liquidity and cash flow in future periods (in thousands):

		Payments due by period					
	Total	Less Than 1 Year	1 – 3 Years	3 – 5 Years	More Than 5 Years		
Long-term debt	461,694	60,193	351,099	37,934	12,468		
Interest on debt (1)	28,160	10,670	15,298	1,608	584		
Operating lease obligations (2)	121,073	27,284	40,397	29,851	23,541		
Deferred payroll taxes (3)	10,288	10,288	_	_	_		
Purchase obligations	11,452	11,452	_	_	_		
Total	\$ 632,667	\$ 119,887	\$ 406,794	\$ 69,393	\$ 36,593		

- (1) Interest payments on debt include fixed rate interest and variable rate interest based on the debt balance and applicable rate at December 31, 2020. Total interest reported includes \$9.1 million of fixed rate interest and \$19.1 million of variable rate interest.
- (2) Certain operating lease obligations in a currency other than the U.S. dollar will be affected by the exchange rate in effect at the time each cash payment is made.
- (3) Represents employer social security taxes deferred under the CARES Act and expected to be paid in 2021.

At December 31, 2020, the total amount of gross unrecognized tax benefits was \$0.2 million. This amount is not included in the above table as the Company cannot reasonably estimate the timing of cash settlements, if any, with taxing authorities. At December 31, 2020, the Company has insurance and claims liabilities of \$25.0 million, of which \$13.3 million are covered by insurance. These amounts are not included in the above table as the Company cannot reasonably estimate the timing of cash settlements on these liabilities.

#### **Off-Balance Sheet Arrangements**

None.

#### **Legal Matters**

We are subject to various legal proceedings and other contingencies, the outcomes of which are subject to significant uncertainty. We accrue for estimated losses if it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. We use judgment and evaluate, with the assistance of legal counsel, whether a loss contingency arising from litigation should be disclosed or recorded. The outcome of legal proceedings is inherently uncertain, so typically a loss cannot be precisely estimated. Accordingly, if the outcome of legal proceedings is different than is anticipated by us, we would have to record the matter at the actual amount at which it was resolved, in the period resolved, impacting our results of operations and financial position for the period. See Item 8, Note 16 to the Consolidated Financial Statements.

# **Critical Accounting Policies**

Our financial statements have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, operating revenues and operating expenses.

Critical accounting policies are those that are both (1) important to the portrayal of our financial condition and results of operations and (2) require management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. As the number of variables and assumptions affecting the possible future resolution of the uncertainties increase, those judgments become even more subjective and complex. In order to provide an understanding about how our management forms its judgments about future events, including the variables and assumptions underlying the estimates, and the sensitivity of those judgments to different circumstances, we have identified our critical accounting policies below.

#### **Revenue Recognition**

We recognize revenue as control of the promised goods or services is transferred to our customers, in an amount that reflects the consideration the Company expects to receive in exchange for its services. For our transportation services businesses, which include truckload, brokerage, intermodal and dedicated services, revenue is recognized over-time as the performance obligations on the in-transit services are completed. For the Company's value-added service businesses, we have elected to use the "right to invoice" practical expedient, reflecting that a customer obtains the benefit associated with value-added services as they are provided. For additional information on revenue recognition, see Item 8, Note 3 to the Consolidated Financial Statements.

### Allowance for Uncollectible Receivables

The allowance for potentially uncollectible receivables is based on a combination of historical data, cash payment trends, specific customer issues, write-off trends, general economic conditions and other factors. Management continuously monitors these factors to arrive at the estimate of accounts receivable that may be ultimately uncollectible. The receivables analyzed include trade receivables, as well as loans and advances made to owner-operators. All other balances are reviewed on a pooled basis. This analysis requires us to make significant estimates. Changes in the facts and circumstances that these estimates are based upon and changes in the general economic environment could result in a material change to the allowance for uncollectible receivables. These changes include, but are not limited to, deterioration of customers' financial position, changes in our relationships with our customers, agents and owner-operators and unforeseen issues relating to individual receivables. Based on our 2020 allowance for uncollectible receivables, a 10% increase in the allowance would increase our bad debt expense by \$0.5 million.

#### **Insurance and Claim Costs**

We maintain auto liability, workers compensation and general liability insurance with licensed insurance carriers. We are self-insured for all cargo and equipment damage claims. Insurance and claims expense represents premiums paid by us and the accruals made for claims within our self-insured retention amounts. A liability is recognized for the estimated cost of all self-insured claims including an estimate of incurred but not reported claims based on historical experience and for claims expected to exceed our policy limits. In addition, legal expenses related to auto liability claims are covered under our policy. We are responsible for all other legal expenses related to claims.

We establish reserves for anticipated losses and expenses related to cargo and equipment damage claims and auto liability claims. The reserves consist of specific reserves for all known claims and an estimate for claims incurred but not reported, and losses arising from known claims ultimately settling in excess of insurance coverage using loss development factors based upon industry data and past experience. In determining the reserves, we specifically review all known claims and record a liability based upon our best estimate of the amount to be paid. In making our estimate, we consider the amount and validity of the claim, as well as our past experience with similar claims. In establishing the reserve for claims incurred but not reported, we consider our past claims history, including the length of time it takes for claims to be reported to us. Based on our past experience, the time between when a claim occurs and when it is reported to us is short. As a result, we believe that the number of incurred but not reported claims at any given point in time is small. These reserves are periodically reviewed and adjusted to reflect our experience and updated information relating to specific claims. As of December 31, 2020, we did not have any reserves for workers' compensation or general liability claims. If we experience claims that are not covered by our insurance or that exceed our estimated claim reserve, it could increase the volatility of our earnings and have a materially adverse effect on our financial condition, results of operations or cash flows. Based on our 2020 reserve for claims incurred but not reported, a 10% increase in claims incurred but not reported, would increase our insurance and claims expense by approximately \$0.5 million.

#### Valuation of Long-Lived Assets, including Goodwill and Intangible Assets

We are required to test goodwill for impairment annually or more frequently, whenever events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit with goodwill below its carrying amount. We annually test goodwill impairment during the third quarter. Goodwill represents the excess purchase price over the fair value of assets acquired in connection with our acquisitions. We continually assess whether any indicators of impairment exist, which requires a significant amount of judgment. Such indicators may include a sustained significant decline in our share price and market capitalization; a decline in our expected future cash flows; a significant adverse change in legal factors or in the business climate; unanticipated competition; overall weaknesses in our industry; and slower growth rates. Adverse changes in these factors could have a significant impact on the recoverability of goodwill and could have a material impact on our consolidated financial statements. The Company has the option to first assess qualitative factors such as current performance and overall economic conditions to determine whether or not it is necessary to perform a quantitative goodwill impairment test. If we choose that option, then we would not be required to perform a quantitative goodwill impairment test unless we determine that, based on a qualitative assessment, it is more likely than not that the fair value of a reporting unit is less than its carrying value. If we determine that it is more likely than not, or if we choose not to perform a qualitative assessment, we then proceed with the quantitative assessment. Under the quantitative test, if the fair value of a reporting unit exceeds its carrying amount, then goodwill of the reporting unit is considered to not be impaired. If the carrying amount of the reporting unit exceeds its fair value, then an impairment loss is recognized in an amount equal to the excess, up to the value of the goodwill. During the third quarter of 2020, we completed our goodwill impairment testing by performing a quantitative assessment using the income approach for each of our reporting units with goodwill. The determination of the fair value of the reporting units requires us to make estimates and assumptions related to future revenue, operating income and discount rates. Based on the results of this test, no impairment loss was recognized. We estimate that a 10% decrease in the fair value of our reporting units would not have caused an impairment loss to be recognized.

We evaluate the carrying value of long-lived assets, other than goodwill, for impairment by analyzing the operating performance and anticipated future cash flows for those assets, whenever events or changes in circumstances indicate that the carrying amounts of such assets may not be recoverable. We evaluate the need to adjust the carrying value of the underlying assets if the sum of the expected cash flows is less than the carrying value. Our projection of future cash flows, the level of actual cash flows, the methods of estimation used for determining fair values and salvage values can impact impairment. Any changes in management's judgments could result in greater or lesser annual depreciation and amortization expense or impairment charges in the future. Depreciation and amortization of long-lived assets is calculated using the straight-line method over the estimated useful lives of the assets.

#### **Recently Issued Accounting Pronouncements Not Currently Effective**

See Item 8: Note 2 to the Consolidated Financial Statements for discussion of new accounting pronouncements.

#### ITEM 7A: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

#### **Interest Rate Risk**

Our principal exposure to interest rate risk relates to outstanding borrowing under our Credit Facility, Real Estate Financing and Margin Facility, all of which charge interest at floating rates. Borrowings under the credit agreements with each of the banks bear interest at LIBOR or a base rate, plus an applicable margin. Our Margin Facility bears interest at a floating rate equal to LIBOR plus 1.10%. As of December 31, 2020, we had total variable interest rate borrowings of \$331.8 million. Assuming variable rate debt levels remain at \$331.8 million for a full year, a 100 basis point increase in interest rates on our variable rate debt would increase interest expense approximately \$3.3 million annually.

In connection with the Real Estate Financing, we entered into interest rate swap agreements to fix a portion of the interest rates on our variable rate debt that has a combined notional amount of \$13.1 million at December 31, 2020. Under the swap agreements, the Company receives interest at the one-month LIBOR rate plus 2.25% and pays a fixed rate. The first swap became effective in October 2016, has a rate of 4.16% (amortizing notional amount of \$10.0 million) and expires in July 2026. The second swap became effective in October 2016, has a rate of 3.83% (amortizing notional amount of \$3.1 million) and expires in May 2022. At December 31, 2020, the fair value of the swap agreements was a liability of \$0.6 million. Since these swap agreements qualify for hedge accounting, the changes in fair value are recorded in other comprehensive income (loss), net of tax.

Included in cash and cash equivalents is approximately \$9,000 in short-term investment grade instruments. The interest rates on these instruments are adjusted to market rates at least monthly. In addition, we have the ability to put these instruments back to the issuer at any time. Accordingly, any future interest rate risk on these short-term investments would not be material.

### **Commodity Price Risk**

Fluctuations in fuel prices can affect our profitability by affecting our ability to retain or recruit owner-operators. Our owner-operators bear the costs of operating their tractors, including the cost of fuel. The tractors operated by our owner-operators consume large amounts of diesel fuel. Diesel fuel prices fluctuate greatly due to economic, political and other factors beyond our control. To address fluctuations in fuel prices, we seek to impose fuel surcharges on our customers and pass these surcharges on to our owner-operators. Historically, these arrangements have not fully protected our owner-operators from fuel price increases. If costs for fuel escalate significantly it could make it more difficult to attract additional qualified owner-operators and retain our current owner-operators. If we lose the services of a significant number of owner-operators or are unable to attract additional owner-operators, it could have a materially adverse effect on our financial condition, results of operations and cash flows.

Exposure to market risk for fluctuations in fuel prices also relates to a small portion of our transportation service contracts for which the cost of fuel is integral to service delivery and the service contract does not have a mechanism to adjust for increases in fuel prices. Increases and decreases in the price of fuel are generally passed on to our customers for which we realize minimal changes in profitability during periods of steady market fuel prices. However, profitability may be positively or negatively impacted by sudden increases or decreases in market fuel prices during a short period of time as customer pricing for fuel services is established based on market fuel costs. We believe the exposure to fuel price fluctuations would not materially impact our results of operations, cash flows or financial position. Based upon our 2020 fuel consumption, a 10% increase in the average annual price per gallon of diesel fuel would increase our annual fuel expense on company owned tractors by approximately \$1.3 million.

### **Equity Securities Risk**

We hold certain actively traded marketable equity securities, which subjects the Company to fluctuations in the fair market value of its investment portfolio based on current market price. The recorded value of marketable equity securities decreased to \$6.5 million at December 31, 2020 from \$9.4 million at December 31, 2019. The decrease resulted from a decrease in the market value of the portfolio of approximately \$1.6 million and sales of marketable equity securities totaling approximately \$1.6 million, with realized losses on sales of \$19,000. These decreases were partially offset by purchases of marketable securities totaling approximately \$0.4 million. A 10% decrease in the market price of our marketable equity securities would cause a corresponding 10% decrease in the carrying amounts of these securities, or approximately \$0.7 million. For additional information with respect to the marketable equity securities, see Item 8, Note 5 to the Consolidated Financial Statements.

# Foreign Exchange Risk

In the years ended December 31, 2020 and 2019, 2.2% and 2.1%, respectively, of our revenues were derived from services provided outside the United States, principally in Mexico, Canada and Colombia. Exposure to market risk for changes in foreign currency exchange rates relates primarily to selling services and incurring costs in currencies other than the local currency and to the carrying value of net investments in foreign subsidiaries. As a result, we are exposed to foreign currency exchange rate risk due primarily due to translation of the accounts of our Mexican, Canadian and Colombian operations from their local currencies into U.S. dollars and also to the extent we engage in cross-border transactions. The majority of our exposure to fluctuations in the Mexican peso, Canadian dollar, and Colombian peso is naturally hedged, since a substantial portion of our revenues and operating costs are denominated in each country's local currency. Based on 2020 expenditures denominated in foreign currencies, a 10% decrease in the exchange rates would increase our annual operating expenses by approximately \$2.4 million. Historically, we have not entered into financial instruments for trading or speculative purposes. Short-term exposures to fluctuating foreign currency exchange rates are related primarily to intercompany transactions. The duration of these exposures is minimized by ongoing settlement of intercompany trading obligations.

The net investments in our Mexican, Canadian and Colombian operations are exposed to foreign currency translation gains and losses, which are included as a component of accumulated other comprehensive income in our statement of shareholders' equity. Adjustments from the translation of the net investment in these operations decreased equity by approximately \$2.8 million for the year ended December 31, 2020.

#### ITEM 8: FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

### Report of Independent Registered Public Accounting Firm

Shareholders and Board of Directors Universal Logistics Holdings, Inc. Warren, Michigan

#### **Opinion on the Consolidated Financial Statements**

We have audited the accompanying consolidated balance sheets of Universal Logistics Holdings, Inc. (the "Company") as of December 31, 2020 and 2019, the related consolidated statements of income, comprehensive income, cash flows and shareholders' equity for each of the three years in the period ended December 31, 2020, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2020, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") and our report dated March 16, 2021 expressed an adverse opinion thereon.

#### **Change in Accounting Principles**

As discussed in Note 2, the Company changed its method of accounting for leases in 2019.

#### **Basis for Opinion**

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

## Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

# Goodwill Impairment Assessment

As described in Note 1 to the consolidated financial statements, the Company's consolidated goodwill balance was \$170.7 million at December 31, 2020. Goodwill is tested for impairment at least annually at the reporting unit level. The Company performed a quantitative impairment analysis using the income approach for each of its reporting units. The determination of the fair value of the reporting units requires management to make significant estimates and assumptions related to forecasts of future revenue, operating income and discount rates taking into consideration recent business and market trends.

We identified goodwill impairment assessment of a certain reporting unit whose operations are cyclical in nature as a critical audit matter. The principal considerations for our determination include significant judgment required by management when developing the fair value measurement of the reporting unit using the income approach, including assumptions relating to revenue growth rates, operating income and discount rates. Auditing these elements involved especially subjective auditor judgment due to the nature and extent of audit effort required to address these matters, including the extent of specialized skill or knowledge needed.

The primary procedures we performed to address this critical audit matter included:

- Testing the design, implementation and operating effectiveness of controls relating to management's goodwill impairment assessment, including controls over assessment of the reasonableness of assumptions used in the income approach.
- Evaluating the reasonableness of management assumptions used in the forecasts of future revenue and operating margin through: (i) comparing these assumptions to historical operating results for the reporting units and external market and industry data, and (ii) evaluating the reasonableness of these assumptions against evidence obtained in other areas of the audit.
- Utilizing personnel with specialized knowledge and skill with valuation to assist in assessing the reasonableness of certain valuation assumptions, such as the
  discount rate, incorporated into the income approach.

/s/ BDO USA, LLP

We have served as the Company's auditor since 2013.

Troy, Michigan March 16, 2021

Consolidated Balance Sheets December 31, 2020 and 2019 (In thousands, except share data)

Notes to Consolidated Financial Statements December 31, 2020, 2019 and 2018

#### (1) Summary of Significant Accounting Policies

### (a) Business

Universal Logistics Holdings, Inc. ("Universal" or the "Company"), through its subsidiaries, is a leading asset-light provider of customized transportation and logistics solutions throughout the United States, and in Mexico, Canada and Colombia. We provide our customers with supply chain solutions that can be scaled to meet their changing demands. We offer our customers a broad array of services across their entire supply chain, including truckload, brokerage, intermodal, dedicated and value-added services. Our customized solutions and flexible business model are designed to provide us with a highly variable cost model.

### (b) Basis of Presentation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany accounts and transactions relating to these entities have been eliminated.

Our fiscal year consists of four quarters, each with thirteen weeks.

#### **Immaterial Revision to Prior Period Financial Statements**

Subsequent to the issuance of the October 3, 2020 consolidated financial statements, an error was identified within the consolidated balance sheet related to a lease that had been entered into effective June 2019, but for which the Company had not recognized the respective right-of-use asset and corresponding lease liability as of December 31, 2019 of \$7.4 million. The Company had also excluded the related \$7.4 million of non-cash activity and the related future lease payments from its disclosures for the year ended December 31, 2019. The Company assessed the materiality of the error considering both the qualitative and quantitative factors and determined that as of and for the six-month period ended June 29, 2019, the nine-month period ended September 28, 2019, the year ended December 31, 2019, the three-month period ended April 4, 2020, the six-month period ended July 4, 2020, and the nine-month period ended October 3, 2020, the adjustments were not material. The Company has decided to correct the prior period presentation to provide comparability to the 2020 financial statements. Corresponding footnotes have been adjusted accordingly. The adjustments had no impact to the Consolidated Statements of Income and Shareholders' Equity. See Note 13 "Leases" for further information.

#### COVID-19

In March of 2020, the World Health Organization declared the coronavirus outbreak (COVID-19) a pandemic. The Company remains committed to doing its part to protect its employees, customers, vendors and the general public from the spread of COVID-19. We will continue to adapt our operations as required to ensure safety while continuing to provide a high level of service to our customers.

To mitigate the impact to our business, we implemented numerous cost reduction efforts beginning in the second quarter including furloughing a portion of the direct labor force, requiring employees to take unpaid time-off, restricting travel, reducing discretionary spending, and various other measures. Also during the second quarter we began taking advantage of the cash deferral programs available for payment of employer social security taxes and federal and state income taxes under the Coronavirus Aid, Relief, and Economic Security Act ("CARES" Act).

The Company makes estimates and assumptions that affect reported amounts and disclosures included in its financial statements and accompanying notes and assesses certain accounting matters that require consideration of forecasted financial information. The Company's assumptions about future conditions important to these estimates and assumptions are subject to uncertainty, including the impacts of the COVID-19 pandemic.

Although we estimate COVID-19 had the largest impact on our business during the second quarter 2020, we are unable to predict with any certainty the future impact COVID-19 may have on our operational and financial performance. The Company will continue to monitor these conditions in future periods as new information becomes available and will update its analyses accordingly.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (1) Summary of Significant Accounting Policies—continued

### (c) Use of Estimates

The preparation of the consolidated financial statements requires management of the Company to make a number of estimates and assumptions related to the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Significant items subject to such estimates and assumptions include the fair value of assets and liabilities acquired in business combinations; carrying amounts of property and equipment and intangible assets; marketable securities; valuation allowances for receivables; and liabilities related to insurance and claim costs. Actual results could differ from those estimates.

### (d) Cash and Cash Equivalents

We consider all highly liquid investments, purchased with a maturity of three months or less, to be cash equivalents. Accounts at banks with an aggregate excess of the amount of checks issued over cash balances are included as accounts payable in current liabilities in the consolidated balance sheets, and changes in such accounts are reported as cash flows from operating activities in the consolidated statements of cash flows.

#### (e) Marketable Securities

Marketable equity securities are measured at fair value, with changes in fair value recognized in net income. At December 31, 2020 and 2019, the Company's marketable securities, all of which are available-for-sale, consist of common and preferred stocks with readily determinable fair values. The cost of securities sold is based on the specific identification method, and interest and dividends are included in non-operating income (expense). See Note 5 "Marketable Securities" for further information on our portfolio.

### (f) Accounts Receivable

Accounts receivable are recorded at the net invoiced amount, net of an allowance for doubtful accounts, and do not bear interest. They include amounts for services rendered in the respective period but not yet billed to the customer until a future date, which typically occurs within one month. In order to reflect customer receivables at their estimated net realizable value, we record charges against revenue based upon current information. These charges generally arise from rate changes, errors, and revenue adjustments that may arise from contract disputes or differences in calculation methods employed by the customer. The allowance for doubtful accounts is our best estimate of the amount of probable credit losses in our existing accounts receivable. We determine the allowance based on historical write-off experience and the aging of our outstanding accounts receivable. Balances are considered past due based on invoiced terms. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. We do not have any off-balance-sheet credit exposure related to our customers. Accounts receivable from affiliates are shown separately and include trade receivables from the sale of services to affiliates.

#### (g) Inventories

Included in prepaid expenses and other is inventory used in a portion of our value-added service operations. Inventories are stated at the lower of cost or net realizable value. Cost is determined using the first-in, first-out method. Provisions for excess and obsolete inventories are based on our assessment of excess and obsolete inventory on a product-by-product basis.

At December 31, inventory consists of the following (in thousands):

	2020	2019
Finished goods	\$ 6,893	\$ 5,776
Raw materials and supplies	1,383	1,387
Total	\$ 8,276	\$ 7,163

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

### (1) Summary of Significant Accounting Policies—continued

#### (h) Property and Equipment

Property and equipment, including leasehold improvements, are carried at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets as follows:

Description	Life in Years
Transportation equipment	3 - 15
Other operating assets	3 - 15
Information technology equipment	3 - 5
Buildings and related assets	10 - 39

The amounts recorded for depreciation expense were \$58.9 million, \$59.0 million, and \$48.7 million for the years ended December 31, 2020, 2019 and 2018, respectively.

Tire repairs, replacement tires, replacement batteries, consumable tools used in our logistics services, and routine repairs and maintenance on vehicles are expensed as incurred. Parts and fuel inventories are included in prepaid expenses and other. We capitalize certain costs associated with vehicle repairs and maintenance that materially extend the life or increase the value of the vehicle or pool of vehicles.

# (i) Intangible Assets

Intangible assets subject to amortization consist of agent and customer relationships, customer contracts, tradenames, and non-competition agreements that have been acquired in business combinations. These assets are amortized either over the period of economic benefit or on a straight-line basis over the estimated useful lives of the related intangible asset. The estimated useful lives of these intangible assets range from three to nineteen years. The useful lives of acquired trademarks are indefinite and, therefore, not subject to amortization.

Our identifiable intangible assets as of December 31, 2020 and 2019 are as follows (in thousands):

	2020					2019						
		oss Carrying Amount	g Accumulated Amortization		Net Carrying Amount		Gross Carrying Amount		ng Accumulated Amortization			t Carrying Amount
Definite Lived Intangibles:												
Agent and customer relationships	\$	165,990	\$	69,124	\$	96,866	\$	164,657	\$	55,880	\$	108,777
Customer contracts		20,600		20,600		_		20,600		20,600		_
Tradenames		4,000		2,731		1,269		4,000		1,333		2,667
Non-compete agreements		2,720		1,119		1,601		2,720		553		2,167
Indefinite Lived Intangibles:												
Trademarks		2,500		_		2,500		2,500		_		2,500
Total Identifiable Intangible Assets	\$	195,810	\$	93,574	\$	102,236	\$	194,477	\$	78,366	\$	116,111

Estimated amortization expense by year is as follows (in thousands):

2021	\$ 13,866
2022	11,740
2023	11,340
2024	10,365
2025	9,714
Thereafter	42,711
Total	\$ 99,736

The amounts recorded for amortization expense were \$15.2 million, \$15.7 million, and \$5.7 million for the years ended December 31, 2020, 2019 and 2018, respectively.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (1) Summary of Significant Accounting Policies—continued

#### (j) Goodwill

Goodwill represents the excess purchase price over the fair value of assets acquired in connection with the Company's acquisitions. Under Financial Accounting Standards Board ("FASB") Accounting Standards Codification, or ASC, Topic 350 "Intangibles – Goodwill and Other", we are required to test goodwill for impairment annually (in our third fiscal quarter) or more frequently, whenever events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit with goodwill below its carrying amount. We have the option to first assess qualitative factors such as current performance and overall economic conditions to determine whether or not it is necessary to perform a quantitative goodwill impairment test. If we choose that option, then we would not be required to perform a quantitative goodwill impairment test unless we determine that, based on a qualitative assessment, it is more likely than not that the fair value of a reporting unit is less than its carrying value. If we determine that it is more likely than not, or if we choose not to perform a qualitative assessment, we then proceed with the quantitative assessment. Under the quantitative test, if the fair value of a reporting unit exceeds its carrying amount, then goodwill of the reporting unit is considered to not be impaired. If the carrying amount of the reporting unit exceeds its fair value, then an impairment loss is recognized in an amount equal to the excess, up to the value of the goodwill. During the third quarter of 2020, we completed our goodwill impairment testing by performing a quantitative assessment using the income approach for each of our reporting units with goodwill. The determination of the fair value of the reporting units requires us to make estimates and assumptions related to future revenue, operating income and discount rates. Based on the results of this test, no impairment loss was recognized.

The changes in the carrying amount of goodwill for the years ended December 31, 2020 and 2019 are as follows (in thousands):

Balance as of January 1, 2019	\$	145,152
Business acquisitions		16,520
Purchase accounting adjustments		6,779
Balance as of December 31, 2019	·	168,451
Purchase accounting adjustments		2,279
Balance as of December 31, 2020	\$	170,730

During 2020, the Company made purchase accounting adjustments to the preliminary purchase price allocations of the Company's April 22, 2019 acquisition of Michael's Cartage, Inc. ("Michael's") and November 5, 2019 acquisition of Roadrunner Intermodal Services, LLC, Morgan Southern, Inc., Wando Trucking, LLC, and Central Cal Transportation, LLC (collectively, "Roadrunner Intermodal"). The adjustments resulted in increases of \$2.3 million in goodwill and \$1.3 million in intangible assets, as well as decreases of \$3.3 million in property and equipment, \$1.5 million in other assets, \$2.3 million in current liabilities, and \$0.2 million in deferred tax liabilities. During 2020, the Company also paid an additional \$1.3 million in cash for post-closing adjustments related to the Roadrunner acquisition.

During 2019, the Company made purchase accounting adjustments to the preliminary purchase price allocations of the Company's (i) December 7, 2018 acquisition of Deco Logistics, Inc., d/b/a Container Connection, and Oaktree Logistics, Inc., (ii) October 12, 2018 acquisition of Specialized Rail Service, Inc., and (iii) August 10, 2018 acquisition of Southern Counties Express, Inc. The adjustments resulted in an increase of \$6.8 million in goodwill, \$1.3 million in current liabilities, and \$1.2 million in deferred tax liabilities, respectively, with offsetting decreases of \$3.6 million in intangible assets, \$3.4 million in property and equipment, \$1.2 million in other assets, and \$0.1 million in current assets. The Company also paid an additional \$1.0 million in cash.

At both December 31, 2020 and 2019, \$56.3 million of goodwill was recorded in our contract logistics segment. At December 31, 2020 and 2019, \$101.1 million and \$98.9 million of goodwill was recorded in our intermodal segment, respectively. At both December 31, 2020 and 2019, \$9.8 million of goodwill was recorded in our trucking segment and \$3.5 million in our company-managed brokerage segment.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (1) Summary of Significant Accounting Policies—continued

# (k) Long-Lived Assets

Long-lived assets, other than goodwill and indefinite lived intangibles such as property and equipment and purchased intangible assets subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or group may not be recoverable. If circumstances require a long-lived asset to be tested for possible impairment, we first compare the undiscounted cash flows expected to be generated by a long-lived asset or group to its carrying value. If the carrying value of the long-lived asset or group is deemed to not be recoverable on an undiscounted cash flow basis, an impairment charge is recognized to the extent that the carrying value exceeds its fair value. Fair value is determined through various valuation techniques including discounted cash flow models, quoted market prices and independent third-party appraisals. Changes in management's judgment relating to salvage values and/ or estimated useful lives could result in greater or lesser annual depreciation expense or impairment charges in the future. Indefinite lived intangibles are tested for impairment annually by comparing the carrying value of the assets to their fair value.

#### (1) Contingent Consideration

Contingent consideration arrangements granted in connection with a business combination are evaluated to determine whether contingent consideration is, in substance, additional purchase price of an acquired enterprise or compensation for services, use of property or profit sharing. Additional purchase price is added to the fair value of consideration transferred in the business combination and compensation is included in operating expenses in the period it is incurred. Contingent consideration related to additional purchase price is measured to fair value at each reporting date until the contingency is resolved. None of the acquired companies in 2018 or 2019 had contingent consideration arrangements.

#### (m) Fair Value of Financial Instruments

For cash equivalents, accounts receivables, accounts payable, and accrued expenses, the carrying amounts are reasonable estimates of fair value as the assets are readily redeemable or short-term in nature and the liabilities are short-term in nature. Marketable securities, consisting of equity securities, are carried at fair market value as determined by quoted market prices. Our revolving credit and term loan agreements consist of variable rate borrowings. The carrying value of these borrowings approximates fair value because the applicable interest rates are adjusted frequently based on short-term market rates. For our equipment promissory notes, the fair values are estimated using discounted cash flow analyses, based on our current incremental borrowing rates for similar types of borrowing arrangements. See Note 10 "Fair Value Measurement and Disclosures" for further information.

### (n) Deferred Compensation

Deferred compensation relates to our bonus plans. Annual bonuses may be awarded to certain operating, sales and management personnel based on overall Company performance and achievement of specific employee or departmental objectives. Such bonuses are typically paid in annual installments over a five-year period. All bonus amounts earned by and due to employees in the current year are included in accrued expenses and other current liabilities. Those that are payable in subsequent years are included in other long-term liabilities.

### (o) Closing Costs

Our customers may discontinue or alter their business activity in a location earlier than anticipated, prompting us to exit a customer-dedicated facility. We recognize exit costs associated with operations that close or are identified for closure as an accrued liability in the Consolidated Balance Sheets. Such charges include lease termination costs, employee termination charges, asset impairment charges, and other exit-related costs associated with a plan approved by management. If we close an operating facility before its lease expires, costs to terminate a lease are recognized when an early termination provision is exercised, or we record a liability for non-cancellable lease obligations based on the fair value of remaining lease payments, reduced by any existing or prospective sublease rentals. Employee termination costs are recognized in the period that the closure is communicated to affected employees. The recognition of exit and disposal charges requires us to make certain assumptions and estimates as to the amount and timing of such charges. Subsequently, adjustments are made for changes in estimates in the period in which the change becomes known.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (1) Summary of Significant Accounting Policies—continued

#### (p) Revenue Recognition

Revenue is recognized as control of the promised goods or services is transferred to our customers, in an amount that reflects the consideration the Company expects to receive in exchange for its services.

For our transportation services businesses, which include truckload, brokerage, intermodal and dedicated services, the adoption of the standard changed the timing of revenue recognition from "at delivery" to "over-time" as the performance obligations on the in-transit services are completed. A performance obligation is created when a customer submits a bill of lading for the transportation of goods from origin to destination. Performance obligations are satisfied as the shipments move from origin to destination, and transportation revenue is recognized based on the percentage of the service that has been completed at the end of the reporting period.

Value-added services, which are typically dedicated to individual customer requirements, include material handling, consolidation, sequencing, sub-assembly, cross-dock services, kitting, repacking, warehousing and returnable container management. For our value-added service businesses, the adoption of the standard did not change the timing of revenue recognition. We have elected to use the "right to invoice" practical expedient, reflecting that a customer obtains the benefit associated with value-added services as they are provided.

We are the primary obligor when rendering services and assume the corresponding credit risk with customers. We have discretion in setting sales prices and, as a result, our earnings may vary. In addition, we have discretion to choose and negotiate terms with our multiple suppliers for the services ordered by our customers. This includes owner-operators with whom we contract to deliver our transportation services. As such, revenue and the related purchased transportation and commissions are recognized on a gross basis. Fuel surcharges, where separately identifiable, of \$67.9 million, \$89.6 million and \$85.1 million for the years ended December 31, 2020, 2019 and 2018, respectively, are included in operating revenues.

See Note 3, "Revenue Recognition," for more information on revenue recognition.

# (q) Insurance & Claims

Insurance and claims expense represents charges for premiums and the accruals made for claims within our self-insured retention amounts. The accruals are primarily related to auto liability, general liability, cargo and equipment damage, and service failure claims. A liability is recognized for the estimated cost of all self-insured claims including an estimate of incurred but not reported claims based on historical experience and for claims expected to exceed our policy limits. We may also make accruals for personal injury and property damage to third parties, and workers' compensation claims if a claim exceeds our insurance coverage. Such accruals are based upon individual cases and estimates of ultimate losses, incurred but not reported losses, and losses arising from known claims ultimately settling in excess of insurance coverage using loss development factors based upon industry data and past experience. Since the reported accrual is an estimate, the ultimate liability may be materially different from the amount recorded.

If adjustments to previously established accruals are required, such amounts are included in operating expenses in the current period. We maintain insurance with licensed insurance carriers. Legal expenses related to auto liability claims are covered under our insurance policy. We are responsible for all other legal expenses related to claims.

In brokerage arrangements, our exposure to liability associated with accidents incurred by other third-party carriers, who haul freight on our behalf, is reduced by various factors including the extent to which the third party providers maintain their own insurance coverage.

Our insurance expense varies primarily based upon the frequency and severity of our accident experience, insurance rates, coverage limits, and self-insured retention amounts.

## (r) Stock Based Compensation

We record compensation expense for the grant of stock based awards. Compensation expense is measured at the grant date, based on the calculated fair value of the award, and recognized as an expense over the requisite service period (generally the vesting period of the grant). See Note 15 "Stock Based Compensation" for further information.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (1) Summary of Significant Accounting Policies—continued

#### (s) Income Taxes

Deferred income taxes are provided for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

We are no longer subject to U.S. federal income tax examinations by tax authorities for years before 2017. In addition, we file income tax returns in various state, local and foreign jurisdictions. Historically, we have been responsible for filing separate state, local and foreign income tax returns for our self and our subsidiaries. We are no longer subject to state or foreign jurisdiction income tax examinations for years before 2016 and 2015, respectively.

We recognize the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. We recognize interest related to unrecognized tax benefits in income tax expense and penalties in other operating expenses.

### (t) Foreign Currency Translation

The financial statements of the Company's subsidiaries operating in Mexico, Canada and Colombia are prepared to conform to U.S. GAAP and translated into U.S. Dollars by applying a current exchange rate. The local currency has been determined to be the functional currency. Items appearing in the Consolidated Statements of Income are translated using average exchange rates during each period. Assets and liabilities of international operations are translated at period-end exchange rates. Translation gains and losses are reported in accumulated other comprehensive income (loss) as a component of shareholders' equity.

#### (u) Concentrations of Credit Risk

Financial instruments, which potentially subject us to concentrations of credit risk, consist principally of cash and cash equivalents, marketable securities and accounts receivable. We maintain our cash and cash equivalents and marketable securities with high quality financial institutions. We perform ongoing credit evaluations of our customers and generally do not require collateral. Our customers are generally concentrated in the automotive, retail and consumer goods, wind energy, building materials, machinery and metals industries. During the fiscal years ended December 31, 2020, 2019 and 2018, aggregate sales in the automotive industry totaled 29%, 27% and 36% of revenue, respectively. In 2020, 2019 and 2018, General Motors accounted for approximately 14%, 12% and 13% of our total operating revenues, respectively. In 2020, 2019 and 2018, sales to our top 10 customers, including General Motors, totaled 38%, 39% and 39%, respectively.

### (2) Recent Accounting Pronouncements

In June 2016, the FASB issued ASU 2016-13, ("ASU 2016-13"), *Accounting for Credit Losses* (Topic 326). ASU 2016-13 requires the use of an "expected loss" model on certain types of financial instruments. The standard also amends the impairment model for available-for-sale debt securities and requires estimated credit losses to be recorded as allowances instead of reductions to amortized cost of the securities. The new standard will become effective for us beginning with the first quarter 2023 and is not expected to have a material impact on our consolidated financial statements.

On January 1, 2021, the Company adopted ASU 2019-12, *Income Taxes: Simplifying the Accounting for Income Taxes* (Topic 740). The ASU simplifies the accounting for income taxes by removing certain exceptions to the general principles in Topic 740. The ASU also clarifies and amends existing guidance to improve consistent application among reporting entities. The adoption of this standard did not have a material impact on our consolidated financial statements.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (3) Revenue Recognition

On January 1, 2018, the Company adopted Accounting Standards Update ("ASU") 2014-09, *Revenue from Contracts with Customers*, using the modified retrospective transition method with a cumulative adjustment to retained earnings of approximately \$0.2 million. Our transportation services businesses include truckload, brokerage, intermodal and dedicated services. The adoption of ASU 2014-09 changed the timing of revenue recognition for transportation services from at delivery to over-time as the performance obligations on the in-transit services are completed.

The Company broadly groups its services into the following categories: truckload services, brokerage services, intermodal services, dedicated services and value-added services. We disaggregate these categories and report our service lines separately on the Consolidated Statements of Income.

Truckload services include dry van, flatbed, heavy-haul and refrigerated operations. We transport a wide variety of general commodities, including automotive parts, machinery, building materials, paper, food, consumer goods, furniture, steel and other metals on behalf of customers in various industries.

To complement our available capacity, we provide customers freight brokerage services by utilizing third-party transportation providers to move freight. Brokerage services also include full service domestic and international freight forwarding, and customs brokerage.

Intermodal services include rail-truck, steamship-truck and support services. Our intermodal support services are primarily short-to-medium distance delivery of both international and domestic containers between the port or railhead and the customer and drayage services.

Dedicated services are primarily provided in support of automotive and retail customers using van equipment. Dedicated services also include our final mile and ground expedited services. Our dedicated services are primarily short run or round-trip moves within a defined geographic area.

Transportation services are short-term in nature; agreements governing their provision generally have a term of less than one year. They do not contain significant financing components. In accordance with ASU 2014-09, the Company recognizes revenue over the period transportation services are provided to the customer, including service performed as of the end of the reporting period for loads currently in-transit, in order to recognize the value that is transferred to a customer over the course of the transportation service.

We determine revenue in-transit using the input method, under which revenue is recognized based on the duration of time that has lapsed from the departure date (start of transportation services) to the arrival date (completion of transportation services). Measurement of revenue in-transit requires the application of significant judgment. We calculate the estimated percentage of an order's transit time that is complete at period end, and we apply that percentage of completion to the order's estimated revenue.

Value-added services, which are typically dedicated to individual customer requirements, include material handling, consolidation, sequencing, sub-assembly, cross-dock services, kitting, repacking, warehousing and returnable container management. Value-added revenues are substantially driven by the level of demand for outsourced logistics services. Major factors that affect value-added service revenue includes changes in manufacturing supply chain requirements and production levels in specific industries, particularly the North American automotive and Class-8 heavy-truck industries.

Revenue is recognized as control of the promised goods or services is transferred to our customers, in an amount that reflects the consideration the Company expects to receive in exchange for its services.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (3) Revenue Recognition—continued

For the Company's value-added service businesses, the adoption of ASU 2014-09 did not change the timing of revenue recognition. The contracts in our value-added services businesses are negotiated agreements, which contain both fixed and variable components. The variability of revenues is driven by volumes and transactions, which are known as of an invoice date. Value-added service contracts typically have terms that extend beyond one year, and they do not include financing components. The timing of revenue recognition for value-added services will remain the same, as we have elected to use the "right to invoice" practical expedient, reflecting that a customer obtains the benefit associated with value-added services as they are provided.

The following table provides information related to contract balances associated with our contracts with customers (in thousands):

	 cember , 2020	 ecember 1, 2019
Prepaid expenses and other - contract assets	\$ 2,520	\$ 1,156

We generally receive payment for performance obligations within 45 days of completion of transportation services and 65 days for completion of value-added services. Contract assets in the table above generally relate to revenue in-transit at the end of the reporting period.

# **Practical expedients**

The Company elected to use the following practical expedients that are available under ASC 606: (i) to apply the new revenue standard to a portfolio of contracts (or performance obligations) with similar characteristics, as we reasonably expect that the effects on the financial statements of applying this guidance to the portfolio would not differ materially from applying this guidance to the individual contracts; (ii) to recognize commission expense when incurred, which we consider to be a cost to obtain a contract, because the amortization period is less than one year; and (iii) to recognize revenue in the value-added services portfolio in the amount of consideration to which we have a right to invoice, that corresponds directly with the value to the customer of the service completed to date.

The Company does not disclose the value of unsatisfied performance obligations for (i) contracts with an original expected length of one year or less and (ii) contracts for which we recognize revenue at the amount to which we have the right to invoice for services performed.

See also Note 19 for additional information on revenue reported by segment and by geographic region.

# (4) Acquisitions

### 2019 Acquisitions

On November 5, 2019, the Company acquired Roadrunner Intermodal from Roadrunner Transportation Systems, Inc. Roadrunner Intermodal is a nationwide drayage provider, servicing major port and rail locations throughout the United States. The total cash purchase price was \$54.7 million. The Company used available cash and borrowings on its revolving credit facility to finance the acquisition. Approximately \$0.3 million of transaction related costs were incurred in the acquisition.

On April 22, 2019, the Company acquired Michael's. Headquartered in Bridgeview, Illinois, Michael's provides intermodal drayage services to customers primarily within a 300-mile radius of the Chicagoland area. The total cash purchase price was \$21.6 million. The Company used available cash and borrowings on its revolving credit facility to finance the acquisition. Approximately \$0.4 million of transaction related costs were incurred in the acquisition.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (4) Acquisitions—continued

The Company accounted for the acquisitions in accordance with ASC 805, "Business Combinations." Assets acquired and liabilities assumed were recorded at their estimated fair value at acquisition, with the remaining unallocated purchase price recorded as goodwill. The goodwill recorded is included in our intermodal segment and is non-deductible for income tax purposes. For each acquisition, the purchase price was allocated to major classes of assets acquired and liabilities assumed at estimated fair values as of the acquisition date. The allocation of the purchase price in each transaction is as follows (in thousands):

	]	Michael's	_	Roadrunner Intermodal
Current assets	\$	4,474	\$	16,002
Property and equipment		2,831		23,064
Goodwill		6,383		12,417
Intangible assets		9,000		14,000
Other assets		-		3,599
Current liabilities		(1,068)		(8,936)
Long-term liabilities		-		(2,439)
Deferred tax liabilities, net		-		(3,039)
	\$	21,620	\$	54,668

The intangible assets represent the acquired company's customer relationships and non-competition agreements. The acquired customer relationships are being amortized over a period of 11 years and the non-competition agreements are being amortized over a period of five years. The Company used the discounted cash flow method to estimate the fair value of these acquired intangible assets.

#### 2018 Acquisitions

On December 7, 2018, the Company acquired all of the outstanding shares of Deco Logistics, Inc., d/b/a Container Connection, and Oaktree Logistics, Inc. (collectively, "Container Connection"). Based in Riverside, California, Container Connection offers harbor drayage services to the Ports of Los Angeles and Long Beach for customers primarily located within the Inland Empire and Central Valley areas. Container Connection also offers warehousing, secured parking and yard space. The total purchase price was \$61.5 million. To finance the acquisition, the Company used loan proceeds under its credit and security agreement. Approximately \$0.4 million of transaction related costs were incurred in the acquisition, which are reflected in general and administrative expenses in the Consolidated Statements of Income.

On October 12, 2018, the Company acquired all of the outstanding shares of Specialized Rail Service, Inc. ("Specialized Rail"). Specialized Rail offers local and regional intermodal drayage services, as well as transloading, cross-docking, warehousing and distribution, and intermodal facility management. Specialized Rail operates a fleet of over 140 tractors and has facilities in Clearfield, Utah and Las Vegas, Nevada. The total cash purchase price was \$12.7 million. To finance the acquisition, the Company used loan proceeds under an amended revolving credit facility. Approximately \$0.3 million of transaction related costs were incurred in the acquisition, which are reflected in general and administrative expenses in the Consolidated Statements of Income.

On August 10, 2018, the Company acquired all of the outstanding shares of Southern Counties Express, Inc. and certain of its affiliates (collectively, "Southern Counties"). Southern Counties provides full-service harbor drayage, transloading, warehousing, and project cargo services in southern California. The total purchase price was \$65.4 million. To finance the acquisition, the Company used loan proceeds under an amended and restated revolving credit and term loan agreement. Approximately \$0.6 million of transaction related costs were incurred in the acquisition, which are reflected in general and administrative expenses in the Consolidated Statements of Income.

On February 1, 2018, the Company acquired all of the outstanding shares of Fore Transportation, Inc. and certain of its affiliates (collectively, "Fore"). Fore provides its customers with intermodal solutions, including local and regional drayage services. One of the acquired companies owns and leases real property and improvements, including a 28-acre terminal that serves as Fore's corporate headquarters and a container storage facility. The total cash purchase price was \$35.1 million. To fund the acquisition, the Company used a combination of cash and loan proceeds under its margin credit facility, revolving credit facility and secured real estate financing. Approximately \$0.2 million of transaction related costs were incurred in the acquisition, which are reflected in general and administrative expenses in the Consolidated Statements of Income.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (4) Acquisitions—continued

We believe that each acquisition strategically enhances our service offerings in specific geographic regions, and we expect each of them to further diversify our customer base.

The following unaudited pro forma results of operations present consolidated information of the Company as if the 2018 and 2019 Acquisitions were acquired on January 1, 2018 (in thousands, except per share data):

	F	Pro Forma Twelve Month Ended					
		December 31, 2019	December 31, 2018				
Operating revenues	\$	1,624,219	\$	1,731,702			
Income from operations	\$	65,013	\$	103,085			
Net income	\$	36,036	\$	60,697			
Earnings per common share:							
Basic	\$	1.28	\$	2.14			
Diluted	\$	1.28	\$	2.14			

The unaudited pro forma consolidated results are presented for illustrative purposes and do not purport to represent what the results of operations would actually have been had we acquired the 2018 and 2019 acquisitions on January 1, 2018. Further, the financial information does not purport to project the future operating results of the Company on a consolidated basis.

For the year ended December 31, 2019, actual revenue and operating income of the 2019 acquired companies was \$32.1 million and \$0.1 million, respectively. For the year ended December 31, 2018, actual revenue and operating income of the 2018 acquired companies was \$70.9 million and \$5.1 million, respectively.

# (5) Marketable Securities

Marketable equity securities are carried at fair value, with gains and losses in fair market value included in the determination of net income. The fair value of marketable equity securities is determined based on quoted market prices in active markets, as described in Note 10.

The following table sets forth market value, cost, and unrealized gains (losses) on equity securities at December 31 (in thousands):

	2020	2019		
Fair value	\$ 6,534	\$ 9,369		
Cost basis	6,579	7,598		
Unrealized (losses) gains	\$ (45)	\$ 1,771		

The following table sets forth the gross unrealized gains and losses on the Company's marketable securities at December 31 (in thousands):

	 2020	2019
Gross unrealized gains	\$ 1,627	\$ 2,634
Gross unrealized losses	(1,672)	(863)
Net unrealized (losses) gains	\$ (45)	\$ 1,771

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

### (5) Marketable Securities—continued

The following table shows the Company's net realized gains (losses) on marketable equity securities (in thousands):

	2020		2019	2018
Realized gain	 			
Sale proceeds	\$ 1,622	\$	1,596	\$ 5,733
Cost basis of securities sold	1,641		1,289	5,229
Realized (loss) gain	\$ (19)	\$	307	\$ 504
Realized (loss) gain, net of taxes	\$ (14)	\$	230	\$ 379

During the years ended December 31, 2020 and 2019, our marketable equity securities portfolio experienced a net unrealized pre-tax (loss) gain in market value of approximately \$(1,555,000) and \$1,233,000, respectively, which were reported in other non-operating income (expense) for the period.

#### (6) Accounts Receivable

Accounts receivable amounts appearing in the consolidated financial statements include both billed and unbilled receivables. We bill customers in accordance with contract terms, which may result in a brief timing difference between when revenue is recognized and when invoices are rendered. Unbilled receivables, which usually are billed within one month, totaled \$49.6 million and \$29.1 million at December 31, 2020 and 2019, respectively.

Accounts receivable are presented net of an allowance for doubtful accounts. Following is a summary of the activity in the allowance for doubtful accounts for the years ended December 31 (in thousands):

	2020	2019	2018
Balance at beginning of year	\$ 2,545	\$ 1,772	\$ 1,330
Provision for doubtful accounts	5,165	3,133	924
Acquisition of businesses	_	350	253
Uncollectible accounts written off	(2,570)	(2,710)	(735)
Balance at end of year	\$ 5,140	\$ 2,545	\$ 1,772

# (7) Property and Equipment

Property and equipment at December 31 consists of the following (in thousands):

	2020	2019
Transportation equipment	\$ 345,536	\$ 333,899
Land, buildings and related assets	152,827	129,819
Other operating assets	109,872	116,191
Information technology equipment	30,686	29,880
Construction in process	24,663	96
Total property and equipment	 663,584	 609,885
Less accumulated depreciation	(298,789)	(270,062)
Total property and equipment, net	\$ 364,795	\$ 339,823

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

### (8) Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consist of the following items at December 31 (in thousands):

	2020	2019		
Accrued payroll	\$ 11,536	\$	13,020	
Accrued payroll taxes	11,601		1,370	
Driver escrow liabilities	4,045		5,249	
Legal settlements and claims	3,700		6,948	
Commissions, other taxes and other	8,706		8,238	
Total	\$ 39,588	\$	34,825	

### (9) Debt

Debt is comprised of the following (in thousands):

	Interest Rates at	 Decemb	oer 3	1,	
	December 31, 2020	2020		2019	
Outstanding Debt:					
Credit and Security Agreement (1)					
Term Loan	1.85%	\$ 131,250	\$	142,500	
Revolver	1.85%	151,326	51,326 15		
Equipment Financing (2)	2.78% to 5.13%	129,870		128,512	
Real Estate Financing (3)	1.99% to 2.39%	49,248	37,492		
Margin Facility (4)	1.24%	_		_	
Unamortized debt issuance costs		(1,574)		(2,117)	
		460,120		457,612	
Less current portion of long-term debt		59,713		59,476	
Total long-term debt, net of current portion		\$ 400,407	\$	398,136	

- (1) Our Credit and Security Agreement (the "Credit Agreement") provides for maximum borrowings of \$350 million in the form of a \$150 million term loan and a \$200 million revolver. Term loan proceeds were advanced on November 27, 2018 and mature on November 26, 2023. The term loan will be repaid in consecutive quarterly installments, as defined in the Credit Agreement, commencing March 31, 2019, with the remaining balance due at maturity. Borrowings under the revolving credit facility may be made until and mature on November 26, 2023. Borrowings under the Credit Agreement bear interest at LIBOR or a base rate plus an applicable margin for each based the Company's leverage ratio. The Credit Agreement is secured by a first priority pledge of the capital stock of applicable subsidiaries, as well as first priority perfected security interest in cash, deposits, accounts receivable, and selected other assets of the applicable borrowers. The Credit Agreement includes customary affirmative and negative covenants and events of default, as well as financial covenants requiring minimum fixed charge coverage and leverage ratios, and customary mandatory prepayments provisions. At December 31, 2020, we were in compliance with all covenants under the facility, and \$48.7 million was available for borrowing on the revolver.
- (2) Our Equipment Financing consists of a series of promissory notes issued by a wholly owned subsidiary. The equipment notes, which are secured by liens on specific titled vehicles, include certain affirmative and negative covenants, are generally payable in 60 monthly installments and bear interest at fixed rates ranging from 2.78% to 5.13%.
- (3) Our Real Estate Financing consists of a series of promissory notes issued by a wholly owned subsidiary. The promissory notes, which are secured by first mortgages and assignment of leases on specific parcels of real estate and improvements, include certain affirmative and negative covenants and are generally payable in 120 monthly installments. Each of the notes bears interest at a variable rate ranging from LIBOR plus 1.85% to LIBOR plus 2.25%. At December 31, 2020, we were in compliance with all covenants.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (9) Debt—continued

(4) Our Margin Facility is a short-term line of credit secured by our portfolio of marketable securities. It bears interest at LIBOR plus 1.10%. The amount available under the line of credit is based on a percentage of the market value of the underlying securities. At December 31, 2020, the maximum available borrowings under the line of credit were \$4.2 million.

The following table reflects the maturities of our principal repayment obligations as of December 31, 2020 (in thousands):

Years Ending December 31	Term	Revolver	Equipment Financing	Real Estate Financing	Mar	gin Facility	Total
2021	\$ 11,250	\$ 	\$ 41,582	\$ 7,361	\$		\$ 60,193
2022	15,000	_	36,296	7,361		_	58,657
2023	105,000	151,326	28,755	7,361		_	292,442
2024	_	_	17,585	7,361		_	24,946
2025	_	_	5,627	7,361		_	12,988
Thereafter	_	_	25	12,443		_	12,468
Total	\$ 131,250	\$ 151,326	\$ 129,870	\$ 49,248	\$		\$ 461,694

The Company is also party to two interest rate swap agreements that qualify for hedge accounting. The Company executed the swap agreements to fix a portion of the interest rates on its variable rate debt that have a combined notional amount of \$13.1 million at December 31, 2020. Under the swap agreements, the Company receives interest at the one-month LIBOR rate plus 2.25% and pays a fixed rate. The first swap became effective in October 2016, has a rate of 4.16% (amortizing notional amount of \$10.0 million) and expires in July 2026. The second swap became effective in October 2016, has a rate of 3.83% (amortizing notional amount of \$3.1 million) and expires in May 2022. At December 31, 2020 and 2019, the fair value of the swap agreements was a liability of \$0.6 million and \$0.1 million, respectively. Since these swap agreements qualify for hedge accounting, the changes in fair value are recorded in other comprehensive income (loss), net of tax. See Note 10, "Fair Value Measurement and Disclosures" for additional information pertaining to interest rate swaps.

# (10) Fair Value Measurement and Disclosures

ASC Topic 820, "Fair Value Measurements and Disclosures," defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date and expanded disclosures with respect to fair value measurements.

ASC Topic 820 also establishes a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. This hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

- Level 1 Quoted prices in active markets for identical assets or liabilities.
- Level 2 Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

### (10) Fair Value Measurement and Disclosures—continued

We have segregated all financial assets that are measured at fair value on a recurring basis into the most appropriate level within the fair value hierarchy based on the inputs used to determine the fair value at the measurement date in the tables below (in thousands):

		December 31, 2020							
	Leve	Level 1 Level 2			Fair Value Measurement				
Assets									
Cash equivalents	\$	9 \$	_	\$ —	\$ 9				
Marketable securities		6,534			6,534				
Total Assets	\$	6,543 \$	_	\$ —	\$ 6,543				
Liabilities									
Interest rate swaps	\$	— \$	619	\$ —	\$ 619				
Total Liabilities	\$	<u> </u>	619	\$ —	\$ 619				
	<del></del>			-					
			December	31, 2019					
	Leve	el 1			Fair Value Measurement				
Assets	Leve	el 1]	December Level 2	31, 2019 Level 3	Fair Value Measurement				
Assets  Cash equivalents	Leve	el 1 18 \$	Level 2						
			Level 2	Level 3	Measurement				
Cash equivalents		18 \$	Level 2	Level 3	Measurement \$ 18				
Cash equivalents Marketable securities	\$	18 \$ 9,369	Level 2	Level 3 — — —	## 18 9,369				
Cash equivalents Marketable securities	\$	18 \$ 9,369	Level 2	Level 3 — — —	## 18 9,369				
Cash equivalents  Marketable securities  Total Assets	\$	18 \$ 9,369	Level 2	Level 3 — — —	## 18 9,369				
Cash equivalents Marketable securities Total Assets Liabilities	\$ <u>\$</u>	18 \$ 9,369 9,387 \$	Level 2	Level 3  \$  \$  \$	\$ 18 9,369 \$ 9,387				

The valuation techniques used to measure fair value for the items in the tables above are as follows:

- Cash equivalents This category consists of money market funds which are listed as Level 1 assets and measured at fair value based on quoted prices for identical instruments in active markets.
- Marketable securities Marketable securities represent equity securities, which consist of common and preferred stocks, are actively
  traded on public exchanges and are listed as Level 1 assets. Fair value was measured based on quoted prices for these securities in
  active markets.
- Interest rate swaps The fair value of our interest rate swaps is determined using a methodology of netting the discounted future fixed cash payments (or receipts) and the discounted expected variable cash receipts (or payments). The variable cash receipts (or payments) are based on the expectation of future interest rates (forward curves) derived from observed market interest rate curves. The fair value measurement also incorporates credit valuation adjustments reflecting both the Company's nonperformance risk and the respective counterparty's nonperformance risk.

Our revolving credit and term loan agreements and our real estate promissory notes all consists of variable rate borrowings. We categorize borrowings under these credit agreements as Level 2 in the fair value hierarchy. The carrying value of these borrowings approximate fair value because the applicable interest rates are adjusted frequently based on short-term market rates.

For our equipment promissory notes with fixed rates, the fair values are estimated using discounted cash flow analyses, based on our current incremental borrowing rates for similar types of borrowing arrangements. We categorize borrowings under this credit agreement as Level 2 in the fair value hierarchy. The carrying values and estimated fair values of these promissory notes at December 31, 2020 is summarized as follows:

		2020			
			Esti	mated Fair	
	Carr	ying Value	Value		
Equipment promissory notes	\$	129,870	\$	130,562	

We have not elected the fair value option for any of our financial instruments.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (11) Transactions with Affiliates

CenTra, Inc. ("CenTra"), an affiliate of the Company that is owned by our controlling shareholder, Matthew T. Moroun, provides administrative support services to Universal in the ordinary course of business, including legal, human resources, tax, and IT infrastructure and related services. The cost of these services is based on the actual or estimated utilization of the specific service.

Universal also purchases other services from CenTra and other affiliates under common control with CenTra. Following is a schedule of cost incurred and included in operating expenses for services provided by affiliates for the years ended December 31 (in thousands):

	2020		2019		2018
Administrative support services	\$ 2,629	\$	4,085	\$	3,094
Truck fuel, tolls and maintenance	826		895		2,428
Real estate rent and related costs	12,925		11,794		14,295
Insurance and employee benefit plans	47,133		53,050		57,370
Contracted transportation services	22		65		1,240
Total	\$ 63,535	\$	69,889	\$	78,427

We pay CenTra the direct variable cost of maintenance, fueling and other operational support costs for services delivered at our affiliate's trucking terminals that are geographically remote from our own facilities. Such costs are billed when incurred, paid on a routine basis, and reflect actual labor utilization, repair parts costs or quantities of fuel purchased. In connection with our transportation services, we also pay tolls and other fees for international bridge crossings to certain related entities which are under common control with CenTra.

A significant number of our operating locations are located in facilities leased from affiliates. At 28 facilities, occupancy is based on either month-to-month or contractual, multi-year lease arrangements which are billed and paid monthly. Leasing properties provided by an affiliate that owns a substantial commercial property portfolio affords us significant operating flexibility. However, we are not limited to such arrangements. See Note 13, "Leases" for further information regarding the cost of leased properties.

We purchase workers' compensation, property and casualty, cargo, warehousing and other general liability insurance from an insurance company controlled by our majority shareholders. Our employee health care benefits and 401(k) programs are also provided by this affiliate.

Other services from affiliates, including contracted transportation services, are delivered to us on a per-transaction-basis or pursuant to separate contractual arrangements provided in the ordinary course of business. At December 31, 2020 and 2019, amounts due to affiliates were \$17.1 million and \$14.8 million, respectively. In our Consolidated Balance Sheets, we record our insured claims liability and the related recovery from an affiliate insurance provider in insurance and claims, and other receivables. At December 31, 2020 and 2019, there were \$13.3 million and \$9.9 million, respectively, included in each of these accounts for insured claims.

During 2020, we contracted with an affiliate to provide real property improvements for us totaling \$3.0 million and purchased wheels and tires from an affiliate totaling \$618,000 during the same period. During 2018, we made purchases of used equipment from an affiliate totaling \$8,300, and we purchased wheels and tires from an affiliate for new trailering equipment totaling \$466,000 during the same period. There were no such purchases made during 2019.

Services provided by Universal to Affiliates

We periodically assist CenTra and other affiliates under common control with CenTra by providing selected transportation and logistics services in connection with their specific customer contracts or purchase orders. Truck fueling and administrative expenses are presented net in operating expense. Following is a schedule of services provided to CenTra and affiliates for the years ended December 31 (in thousands):

	2	2020		2019		2018
Purchased transportation and equipment rent	\$	947	\$	1,636	\$	900
Total	\$	947	\$	1,636	\$	900

At December 31, 2020 and 2019, amounts due from affiliates were \$1.2 million and \$1.7 million, respectively.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (11) Transactions with Affiliates—continued

During 2020, we exercised our right of first refusal to acquire 6,250 shares of restricted stock from a director, H. E. "Scott" Wolfe, for \$137,800 based on the closing market price on the effective date of the transaction.

We sold a vacant parcel of land to an affiliate for \$2.5 million during 2019. The sales price was established by an independent third party appraisal. The Company's basis in the land was \$2.4 million, resulting in a gain of \$0.1 million.

In August 2019, our Board of Directors authorized the repurchase of up to 600,000 shares of our common stock through a "Dutch auction" tender offer. Subject to certain limitations and legal requirements, we could repurchase up to an additional 2% of our outstanding shares in the tender offer. Following expiration of the tender offer, we accepted 1,101,597 shares tendered through this offer for purchase at a final purchase price of \$22.50 per share, for a total purchase price of approximately \$24.8 million. The tender offer expired on September 13, 2019. The total amount of shares purchased in the tender offer included 600,000 shares tendered by a former director of the Company and 10,000 shares tendered by the Company's Chief Financial Officer, Mr. Jude Beres. We used funds borrowed under our existing line of credit and from our available cash and cash equivalents to fund the purchase of the accepted shares.

#### (12) Income Taxes

A summary of income (loss) related to U.S. and non-U.S. operations are as follows (in thousands):

	Year Ended December 31,							
		2020		2019		2018		
Operations								
U.S. Domestic	\$	63,416	\$	50,102	\$	71,441		
Foreign		494		84		(2,052)		
Total pre-tax income	\$	63,910	\$	50,186	\$	69,389		

The provision (benefit) for income taxes attributable to income from continuing operations for the years ended December 31 consists of the following (in thousands):

	2020	2019	2018
Current:			
U.S. Federal	\$ 14,446	\$ 2,772	\$ 7,266
State	3,694	2,450	3,556
Foreign	864	294	427
Total current	19,004	5,516	11,249
Deferred:			
U.S. Federal	(2,221)	6,392	5,873
State	(96)	(440)	(855)
Foreign	(909)	1,132	944
Total deferred	(3,226)	7,084	5,962
Total	\$ 15,778	\$ 12,600	\$ 17,211

On March 27, 2020, the CARES Act was signed into law that was aimed at providing emergency assistance for individuals, families, and businesses affected by COVID-19. Among other things, the CARES Act includes provisions allowing for the deferral of the employer portion of social security payments. The Company took advantage of this provision and as of December 31, 2020, deferred the cash payment of \$10.2 million in employer social security taxes, which is included in accrued payroll taxes. See Note 8 "Accrued Expenses and Other Current Liabilities". The Company anticipates paying the deferred employer portion in 2021.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (12) Income Taxes—continued

Deferred income tax assets and liabilities at December 31 consist of the following (in thousands):

	2020	2019
Domestic deferred tax assets:		_
Allowance for doubtful accounts	\$ 1,198	\$ 602
Other assets	1,583	3,355
Accrued expenses	6,336	4,132
Total domestic deferred tax assets	\$ 9,117	\$ 8,089
Domestic deferred tax liabilities:		
Prepaid expenses	\$ 885	\$ 782
Marketable securities	498	1,014
Intangible assets	19,363	20,578
Property and equipment	52,797	51,407
Total domestic deferred tax liabilities	\$ 73,543	\$ 73,781
Net domestic deferred tax liabilities	\$ 64,426	\$ 65,692
Foreign deferred tax assets		 
Net operating losses	\$ 4,447	\$ 3,543
Other assets	_	102
Valuation allowance - foreign	(2,288)	(2,185)
Total foreign deferred tax asset	\$ 2,159	\$ 1,460
Net deferred tax liability	\$ 62,267	\$ 64,232

In assessing whether deferred tax assets may be realized in the future, management considers whether it is more likely than not that some portion of such tax assets will not be realized. The deferred tax assets and liabilities were reviewed separately by jurisdictions when measuring the need for valuation allowances. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income (both ordinary income and taxable capital gains) during the periods in which those temporary differences reverse. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Valuation allowances are established when necessary to reduce deferred tax assets when it is more likely than not that a portion or all of the deferred tax assets will not be realized. Based upon the level of historical taxable income, reversal of existing taxable temporary differences, projections for future taxable income over the periods in which the domestic deferred tax assets are expected to reverse, and our ability to generate future capital gains, management believes it is more likely than not that we will realize the benefits of these deductible differences. Thus, no valuation allowance has been established for the domestic deferred tax assets. We had foreign net operating loss carryforward associated with our Mexican subsidiary with a tax effect of \$2.2 million and \$1.4 million as of December 31, 2020 and 2019, respectively. The net operating loss carryforward will expire in 2030. Although realization is not assured, the Company has concluded that it is more likely than not that the deferred tax asset will be fully realized and as such no valuation allowance has been provided. At December 31, 2020 and 2019, we also had foreign net operating loss carryforwards associated with our Canadian and German subsidiaries with a tax effect of \$2.3 million and \$2.2 million, respectively. Based on the anticipated earnings proje

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (12) Income Taxes—continued

Income tax expense attributable to income from continuing operations differs from the statutory rates as follows:

	2020	2019	2018
Federal statutory rate	21%	21%	21%
State, net of federal benefit	4%	3%	3%
Foreign	0%	2%	2%
Other	0%	-1%	-1%
Effective tax rate	25%	25%	25%

As of December 31, 2020, the total amount of unrecognized tax benefit representing uncertainty in certain tax positions was \$0.3 million. These uncertain tax positions are based on recognition thresholds and measurement attributes for the financial statement recognition and measurements of a tax position taken or expected to be taken in a tax return. Any prospective adjustments to our accrual for uncertain tax positions will be recorded as an increase or decrease to the provision for income taxes and would impact our effective tax rate. At December 31, 2020, there are no positions for which it is reasonably possible that the total amounts of unrecognized tax benefits would significantly increase or decrease within 12 months. As of December 31, 2020, the amount of accrued interest and penalties was \$0.1 million and \$0.1 million, respectively.

The changes in our gross unrecognized tax benefits during the years ended December 31 are as follows (in thousands):

	2020	2019	2018	
Unrecognized tax benefit – beginning of year	\$ 279	\$ 331	\$	367
Increases related to prior year tax positions	_	20		26
Increases related to current year tax positions	30	29		30
Decreases related to prior year tax positions	(37)	(101)		(92)
Unrecognized tax benefit – end of year	\$ 272	\$ 279	\$	331

#### (13) Leases

On January 1, 2019, we adopted ASU 2016-02, Leases, which required us to recognize a right-of-use asset and a corresponding lease liability on our balance sheet for most leases classified as operating leases under previous guidance. Right-of-use assets represent our right to use an underlying asset over the lease term and lease liabilities represent the obligation to make lease payments resulting from the lease agreement. We recognize a right-of-use asset and a lease liability on the effective date of a lease agreement.

As of December 31, 2020, our obligations under operating lease arrangements primarily related to the rental of office space, warehouses, freight distribution centers, terminal yards and equipment. Our lease obligations typically do not include options to purchase the leased property, nor do they contain residual value guarantees or material restrictive covenants. Options to extend or terminate an agreement are included in the lease term when it becomes reasonably certain the option will be exercised. As of December 31, 2020, we were not reasonably certain of exercising any renewal or termination options, and as such, no adjustments were made to the right-of-use lease assets or corresponding liabilities.

We did not separate lease and nonlease components of contracts for purposes of determining the right-of use lease asset and corresponding liability. Variable lease components that do not depend on an index or a rate, and variable non-lease components were also not contemplated in the calculation of the right-of-use asset and corresponding liability. For facility leases, variable lease costs include the costs of common area maintenance, taxes, and insurance for which we pay the lessors an estimate that is adjusted to actual expense on a quarterly or annual basis depending on the underlying contract terms. For equipment leases, variable lease costs may include additional fees associated with using equipment in excess of estimated amounts. Leases with an initial term of 12 months or less, short-term leases, are not recorded on the balance sheet. Lease expense for short-term and long-term operating leases is recognized on a straight-line basis over the lease term.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

# (13) Leases—continued

Total lease cost

The following table summarizes our lease costs for the years ended December 31, 2020 and 2019, and related information (in thousands):

Total required lease payments	\$	50,891	\$	70,182	\$ 121,073
Less amounts representing interest					(21,060)
Present value of lease liabilities					\$ 100,013

### **Immaterial Revision to Prior Period Financial Statements**

During 2020, the Company determined that the future minimum lease payment schedule included in the 2019 Annual Report on Form 10-K excluded certain lease commitments (see Note 1(b) "Basis of Presentation"). The table understated the present value of our lease liabilities by \$7.4 million. Lease payments were understated by \$13.6 million (\$1.0 million in year two, \$2.0 million in each of the years three, four and five, and \$6.6 million thereafter). Amounts representing interest was understated by \$6.2 million. The table above has been revised to reflect the corrected amounts. The right-of-use assets obtained in exchange for new operating lease liabilities, weighted-average remaining lease term (in years), and weighted-average discount rate captioned under "Other information" above has also been revised to reflect the excluded lease commitment as of December 31, 2019. The right-of-use assets obtained in exchange for new operating lease liabilities with third parties increased from \$18.8 million to \$26.2 million, the weighted-average remaining lease term (in years) with third parties increased from 4.1 years to 4.9 years, and the weighted-average discount rate for leases with third parties increased from 4.7% to 6.5%. In total, the right-of-use assets obtained in exchange for new operating lease liabilities increased from \$39.8 million to \$47.2 million, the weighted-average remaining lease term (in years) increased from 5.1 years to 5.6 years, and the weighted-average discount rate increased from 6.1% to 7.0%.

The effects of the adjustments on the line items within the Company's Consolidated Balance Sheet at December 31, 2019, were as follows (in thousands):

	mber 31, 2019 viously Reported)	-	Adjustment		December 31, 2019 (As Revised)

### (14) Retirement Plans

We offer 401(k) defined contribution plans to our employees. The plans are administered by a company controlled by our principal shareholders and include different matching provisions depending on which subsidiary or affiliate is involved. In the plans available to certain employees not subject to collective bargaining agreements, we matched contributions up to \$600 annually for each employee who is not considered highly compensated through December 31, 2008, after which some matching contributions were suspended as a response to market conditions at certain subsidiaries. Three other 401(k) plans are provided to employees of specific operations and offer matching contributions that range from zero to \$2,080 per participant annually. The total expense for contributions for 401(k) plans, including plans related to collective bargaining agreements, was \$0.7 million in each of the years ended December 31, 2020 and 2019, \$0.6 million for the years ended December 31, 2018.

In connection with a collective bargaining agreement that covered 13 Canadian employees at December 31, 2020, we are required to make defined contributions into the Canada Wide Industrial Pension Plan. At December 31, 2020 and 2019, the required contributions totaled approximately \$38,000 and \$36,000, respectively.

### (15) Stock Based Compensation

On April 23, 2014, our Board of Directors adopted our 2014 Amended and Restated Stock Incentive Plan. The Plan was approved at the 2014 annual meeting of shareholders and became effective as of the date our Board adopted it. The 2014 Plan replaced our 2004 Stock Incentive Plan and carried forward the shares of common stock that remained available for issuance under the 2004 Plan. The grants under the Plan may be made in the form of options, restricted stock awards, restricted stock purchase rights, stock appreciation rights, phantom stock units, restricted stock units or shares of unrestricted common stock.

On February 5, 2020, the Company granted 5,000 shares of restricted stock to our Chief Financial Officer. The restricted stock award has a fair value of \$17.74 per share, based on the closing price of the Company's stock on the grant date. The shares will vest on February 20, 2024, subject to his continued employment with the Company.

On January 10, 2020, the Company granted 60,000 shares of restricted stock to our Chief Executive Officer. The restricted stock award has a fair value of \$18.82 per share, based on the closing price of the Company's stock on the grant date. The shares will vest in installments of 20,000 shares on January 10, 2024 and January 10, 2026, and installments of 10,000 shares on January 10, 2027 and January 10, 2028, subject to his continued employment with the Company.

On February 20, 2019, the Company granted 44,500 shares of restricted stock to certain of its employees, including 12,000 shares to our then Chief Executive Officer and 10,000 shares to our Chief Financial Officer. The restricted stock awards have a grant date fair value of \$23.56 per share, based on the closing price of the Company's stock, and any non-vested shares under the awards will vest in four equal increments on each February 20 in 2021, 2022 and 2023. The non-vested shares granted to our former Chief Executive Officer on February 20, 2019 were forfeited upon his separation from service with the Company on January 10, 2020.

Notes to Consolidated Financial Statements – (Continued) December 31, 2020, 2019 and 2018

#### (15) Stock Based Compensation—continued

A grantee's vesting of restricted stock awards may be accelerated under certain conditions, including retirement.

A summary of the status of our non-vested shares as of December 31, 2020, and changes during the year ended December 31, 2020, is presented below:

	Shares	Aver	eighted age Grant Fair Value
Non-vested at January 1, 2020	42,000	\$	22.96
Granted	65,000	\$	18.74
Vested	(9,375)	\$	20.86
Forfeited	(12,000)	\$	23.56
Balance at December 31, 2020	85,625	\$	19.90

During the years ended December 31, 2020, 2019 and 2018, the total grant date fair value of vested shares recognized as compensation cost was \$0.2 million, \$0.1 million and \$0.4 million, respectively. As of December 31, 2020, there was \$1.7 million of total unrecognized compensation cost related to non-vested share-based compensation arrangements granted under the Plan. That cost is expected to be recognized on a straight-line basis over the remaining vesting period. That cost is expected to be recognized on a straight-line basis over the remaining vesting period. As a result, the Company expects to recognize stock-based compensation expense of \$0.2 million in each year of 2021, 2022, and 2023, and \$0.4 million in 2024, \$0.3 million in 2026, and \$0.2 million in each 2027 and 2028.

#### (16) Commitments and Contingencies

Our principal commitments relate to long-term real estate leases and payment obligations to equipment vendors.

The Company is involved in certain other claims and pending litigation arising from the ordinary conduct of business. We also provide accruals for claims within our self-insured retention amounts. Based on the knowledge of the facts, and in certain cases, opinions of outside counsel, in the Company's opinion the resolution of these claims and pending litigation will not have a material effect on our financial position, results of operations or cash flows. However, if we experience claims that are not covered by our insurance or that exceed our estimated claim reserve, it could increase the volatility of our earnings and have a materially adverse effect on our financial condition, results of operations or cash flows.

At December 31, 2020, approximately 33% of our employees in the United States, Canada and Colombia are subject to collective bargaining agreements that are renegotiated periodically, of which 38% are subject to contracts that expire in 2021. Of our employees in Mexico, 87% are subject to such collective bargaining agreements, and our contract expiring in 2021 is currently being negotiated.

During the years ended December 31, 2019 and 2018, the Company recorded \$30.0 million and \$9.0 million, respectively, for settlements of previously disclosed legal matters.

# (17) Earnings Per Share

Basic earnings per common share amounts are based on the weighted average number of common shares outstanding, excluding outstanding non-vested restricted stock. Diluted earnings per common share include dilutive common stock equivalents determined by the treasury stock method. For the years ended December 31, 2020, 2019 and 2018, there were 2,990, 910 and 6,912 weighted average non-vested shares of restricted stock, respectively, included in the denominator for the calculation of diluted earnings per share.

For the years ended December 31, 2020 and 2019, 65,000 and 44,500 shares, respectively, were excluded from the calculation of diluted earnings per share because such shares were anti-dilutive. For the year ended December 31, 2018, no shares were excluded from the calculation of diluted earnings per share.

#### (19) Segment Reporting

In December 2020, we changed the way we aggregate our business units and adopted a new segment reporting structure. As part of the new structure, we separated our previous transportation segment into three reportable segments: trucking, intermodal, and company-managed brokerage. In addition, we changed the name of our previous logistics segment to contract logistics. As a result, we now report our financial results in four distinct reportable segments: contract logistics, intermodal, trucking, and company-managed brokerage, which are based primarily on the services each segment provides. This presentation reflects the manner in which management evaluates our operating segments, including an evaluation of economic characteristics and applicable aggregation criteria.

Operations aggregated in our contract logistics segment deliver value-added and/or dedicated transportation services to support in-bound logistics to original equipment manufacturers (OEMs) and major retailers on a contractual basis, generally pursuant to terms of one year or longer. Our intermodal segment is associated with local and regional drayage moves coordinated by company-managed terminals using a mix of owner-operators, company equipment and third-party capacity providers (broker carriers). Operations aggregated in our trucking segment are associated with individual freight shipments coordinated by our agents and company-managed terminals using a mix of owner-operators, company equipment and broker carriers. Our company-managed brokerage segment provides for the pick-up and delivery of individual freight shipments using broker carriers, coordinated by our company-managed operations. Other non-reportable segments are comprised of the Company's subsidiaries that provide support services to other subsidiaries.

Separate balance sheets are not prepared by segment, and we do not provide asset information by segment to the chief operating decision maker.

The following tables summarize information about our reportable segments for the fiscal years ended December 31, 2020, 2019 and 2018 (in thousands):

	Operating Revenues								
	December 31,								
		2020		2019		2018			
Contract logistics	\$	459,666	\$	515,185	\$	529,244

Total	\$ 462,615	\$	434,470				

## (20) Subsequent Events

On February 4, 2021, our Board of Directors declared the regular quarterly cash dividend of \$0.105 per share of common stock, payable to shareholders of record at the close of business on March 1, 2021 and is expected to be paid on April 5, 2021. Declaration of future cash dividends is subject to final determination by the Board of Directors each quarter after its review of our financial condition, results of operations, capital requirements, any legal or contractual restrictions on the payment of dividends and other factors the Board of Directors deems relevant.

### ITEM 9: CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES

None.

#### ITEM 9A: CONTROLS AND PROCEDURES

### **Evaluation of Disclosure Controls and Procedures**

As of the end of the period covered by this annual report, we evaluated, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act")). Management necessarily applied its judgment in assessing the costs and benefits of those controls and procedures, which by their nature, can provide only reasonable assurance about management's control objectives. You should note that the design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and we cannot assure you that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote. Based upon this evaluation, our Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures were not effective because of the material weakness in internal control over financial reporting described below. In light of the material weakness, management performed additional procedures to validate the accuracy and completeness of the financial results impacted by the control deficiencies, including detailed testing and review of all lease obligations.

### **Inherent Limitations over Internal Controls**

The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles ("GAAP"). The Company's internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Company's assets;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that the Company's receipts and expenditures are being made only in accordance with authorizations of the Company's management and directors; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Management, including the Company's Chief Executive Officer and Chief Financial Officer, does not expect that the Company's internal controls will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of internal controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Also, any evaluation of the effectiveness of controls in future periods are subject to the risk that those internal controls may become inadequate because of changes in business conditions, or that the degree of compliance with the policies or procedures may deteriorate.

# Report of Management on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Management conducted an assessment of the effectiveness of the Company's internal control over financial reporting based on the criteria set forth in *Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission*, which is commonly referred to as the 2013 framework.

Based on the assessment performed using the criteria established by COSO, management has concluded that as of December 31, 2020, we did not have sufficient controls in place over the completeness of lease obligations to timely identify modifications to existing leases. As a result, management has concluded that this control deficiency could have resulted in a material misstatement of the consolidated financial statements that would not have been prevented or detected on a timely basis, and as such, these control deficiencies result in a material weakness.

The Company's independent registered public accounting firm, BDO USA LLP, has issued an adverse opinion on the Company's internal control over financial reporting, which appears below.

#### Remediation and Plans for Remediation of Material Weaknesses

We are committed to maintaining a strong internal control environment and implementing measures designed to help ensure that control deficiencies contributing to the material weakness are remediated as soon as possible. Management is currently in the process of planning for and implementing remediation efforts to address the identified material weaknesses.

We plan to remediate our material weakness related to the completeness of lease obligations, including the timely identification of modifications to existing leases, by modifying our policies and procedures for the review and approval of leases to include a periodic review, at least quarterly, of all leases to ensure completeness and requiring dual signatures on all future real property lease agreements.

Management believes the steps outlined above will resolve the control deficiencies identified. We will continue to monitor and improve our internal controls over financial reporting. We may take additional steps or modify our plans for remediation to provide for reasonable assurance that we effectively maintain internal controls over financial reporting. We will consider the material weakness remediated after the applicable controls operate for a sufficient period of time, and management has concluded, through testing, that the controls are operating effectively.

# **Changes in Internal Control over Financial Reporting**

Except as otherwise discussed above, there have been no changes in our internal controls over financial reporting as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during the quarter ended December 31, 2020 identified in connection with our evaluation that has materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

# Report of Independent Registered Public Accounting Firm

Shareholders and Board of Directors Universal Logistics Holdings, Inc. Warren, Michigan

# **Opinion on Internal Control over Financial Reporting**

We have audited Universal Logistics Holdings, Inc.'s (the "Company's") internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO criteria"). In our opinion, the Company did not maintain, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on the COSO criteria.

We do not express an opinion or any other form of assurance on management's statements referring to any corrective actions taken by the Company after the date of management's assessment.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheets of the Company as of December 31, 2020 and 2019, the related consolidated statements of income, comprehensive income, cash flows and shareholders' equity for each of the three years in the period ended December 31, 2020, and the related notes (collectively referred to as "the financial statements") and our report dated March 16, 2021 expressed an unqualified opinion thereon.

### **Basis for Opinion**

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Item 9A, Management's Report on Internal Control over Financial Reporting". Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit of internal control over financial reporting in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. A material weakness regarding management's failure to design and maintain controls over the completeness of lease obligations has been identified and described in management's assessment. This material weakness was considered in determining the nature, timing, and extent of audit tests applied in our audit of the 2020 financial statements, and this report does not affect our report dated March 16, 2021 on those financial statements.

# **Definition and Limitations of Internal Control over Financial Reporting**

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

#### DESCRIPTION OF CAPITAL STOCK

The following is a summary of the material terms of the capital stock of Universal Logistics Holdings, Inc. (the "Company") and the provisions of the Company's Amended and Restated Articles of Incorporation, as amended ("Articles"), and Amended and Restated Bylaws ("Bylaws"). It also summarizes relevant provisions of the Michigan Business Corporation Act, which we refer to as Michigan law, or the "MBCA." Since the terms of our Articles, Bylaws and Michigan law are more detailed than the general information provided below, we urge you to read the actual provisions of those documents and Michigan law. The following summary of our capital stock is subject in all respects to Michigan law, our Articles and our Bylaws. If you would like to read our Articles or Bylaws, these documents are on file with the Securities and Exchange Commission.

### General

The authorized capital stock of the Company consists of 100,000,000 shares of common stock, no par value, and 5,000,000 shares of preferred stock, no par value. As of December 31, 2020, there were 30,979,827 shares of our common stock issued and 26,912,580 shares of our common stock outstanding and no shares of our preferred stock were issued and outstanding. Our common stock is listed on the NASDAQ Stock Market.

#### **Common Stock**

All of the outstanding shares of our common stock are fully paid and non-assessable.

*Voting Rights*. Each holder of our common stock is entitled to cast one vote for each share held of record on all matters submitted to a vote of shareholders, including the election of directors. Holders of our common stock have no cumulative voting rights.

*Dividends*. Holders of our common stock are entitled to receive dividends or other distributions declared by the board of directors. The right of the board of directors to declare dividends is subject to the right of any holders of our preferred stock and the availability under Michigan law of sufficient funds to pay dividends.

*Liquidation Rights.* If the Company is dissolved, our common shareholders will share ratably in the distribution of all assets that remain after we pay all of our liabilities and satisfy our obligations to the holders of any of our preferred stock.

*Preemptive and Other Rights.* Holders of our common stock have no preemptive rights to purchase or subscribe for any stock or other securities of the Company, and there are no conversion rights or redemption or sinking fund provisions with respect to our common stock.

Transfer Agent. The transfer agent and registrar for our common stock is Computershare Trust Company, N.A.

#### Preferred Stock

The board of directors is authorized to issue shares of our preferred stock at any time, without shareholder approval. It has the authority to determine all aspects of those shares, including the following:

- the designation and number of shares;
- the dividend rate and preferences, if any, which dividends on that series of preferred stock will have compared to any other class or series of our capital stock;
- the voting rights, if any;
- the conversion or exchange privileges, if any, applicable to that series;
- the redemption price or prices and the other terms of redemption, if any, applicable to that series; and
- · any purchase, retirement or sinking fund provisions applicable to that series.

Any of these terms could have an adverse effect on the availability of earnings for distribution to the holders of our common stock or for other corporate purposes. We have no agreements or understandings for the issuance of any shares of preferred stock.

# **Provisions That May Discourage Takeovers**

Michigan law and our Bylaws contain provisions that may have the effect of discouraging transactions involving an actual or threatened change of control. These provisions could protect the continuity of our directors and management and possibly deprive shareholders of an opportunity to sell their shares of common stock at prices higher than the prevailing market prices. The following description is subject in its entirety to applicable Michigan law and our Articles and Bylaws.

Ownership of Controlling Shares by the Moroun Family. As of March 8, 2021, our Chairman, Matthew T. Moroun, and his mother, Nora M. Moroun, beneficially own in the aggregate 19,173,222 shares, or 71.22%, of our outstanding common stock. Beneficial ownership of and voting control over this block of shares by the Moroun family could render it more difficult or discourage an attempt to obtain control of the Company by means of a merger, tender offer, proxy contest or otherwise and possibly deprive other shareholders of an opportunity to sell their shares at prices higher than the prevailing market prices.

Availability of Authorized but Unissued Shares. All of our preferred stock and a substantial amount of our common stock are authorized but unissued and not reserved for any particular purpose. Our board of directors may issue shares of authorized common or preferred stock without shareholder approval. If our board of directors decides to issue shares to persons friendly to current management, this could render more difficult or discourage an attempt to obtain control of the Company by means of a merger, tender offer, proxy contest or otherwise. Authorized but unissued shares also could be used to dilute the stock ownership of persons seeking to obtain control of the Company, including dilution through a shareholder rights plan of the type commonly known as a "poison pill," which the board of directors could adopt without a shareholder vote.

*Issuance of Preferred Stock.* In addition, our board of directors could issue preferred shares having voting rights that adversely affect the voting power of our common shareholders, which could have the effect of delaying, deferring or impeding a change in control of the Company.

*No Cumulative Voting.* Under Michigan law, shareholders do not have cumulative voting rights for the election of directors unless the Articles so provide. Our Articles do not provide for cumulative voting.

Limitations on Nomination of Directors. Under our Bylaws, in order for a shareholder to nominate a candidate for director, notice of the nomination must be given to us not less than 90 days before the first anniversary of the preceding year's annual meeting. The shareholder submitting the notice of nomination must describe various matters as specified in our Bylaws, including the name, age and address of each proposed nominee, his or her occupation, the number of shares held by the nominee and any other information that would be required under SEC rules in a proxy statement soliciting proxies for the election of the nominee.

Limitation on Calling Special Meetings of Shareholders. Michigan law allows the board of directors or officers, directors or shareholders authorized in our corporation's Bylaws to call special meetings of shareholders. Our Bylaws provide that a special meeting may be called by our board of directors, the Chairman of the Board or the Chief Executive Officer or shall be called by the Chief Executive Officer or Secretary at the request of shareholders holding a majority of the shares of stock entitled to vote at the proposed special meeting. Business to be transacted at a special meeting is limited by our Bylaws to the purpose or purposes stated in the notice of the meeting.

## **Business Combinations**

We are subject to Chapter 7A of the MBCA, which provides that a business combination subject to Chapter 7A between a covered Michigan corporation or any of its subsidiaries and a beneficial owner of shares entitled to 10% or more of the voting power of such corporation generally require the affirmative vote of 90% of the votes of each class of stock entitled to vote, and not less than 2/3 of each class of stock entitled to vote (excluding voting shares owned by such 10% owner), voting as a separate class. Such requirements do not apply if (1) the corporation's board of directors approves the transaction prior to the time the 10% owner becomes such or (2) the transaction satisfies certain fairness standards; certain other conditions are met, and the 10% owner has been such for at least five years. Chapter 7A business combinations include, among other transactions, mergers, significant asset transfers, certain disproportionate issuances of shares to an interested shareholder, certain reclassifications and recapitalizations disproportionately favorable to such shareholder, and the adoption of a plan of liquidation or dissolution in

which such a shareholder would receive anything other than cash. Chapter 7A does not cover business combinations effected by purchase of shares from other shareholders in the open market or acquired through a tender offer.

# **Choice of Forum**

Our Bylaws, to the fullest extent permitted by law, provide that the Circuit Court of the County of Macomb in the State of Michigan or the United States District Court for the Eastern District of Michigan, Southern Division, are the sole and exclusive forums for (i) any derivative action or proceeding brought on behalf of the Company, (ii) any action asserting a claim of breach of a fiduciary duty owed to the Company or the Company's shareholders by any of the Company's directors, officers, employees or agents, (iii) any action asserting a claim against the Company arising under the MBCA, our Articles or our Bylaws or (iv) any action asserting a claim against the Company that is governed by the internal affairs doctrine. We may consent in writing to alternative forums.

# CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT

# I, Tim Phillips, certify that:

- 1. I have reviewed this annual report on Form 10-K of Universal Logistics Holdings, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors:
  - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
